The solutions are given by the two points where the graph intersects the x-axis.

Example: Solve the equation  $x^2 + x - 3 = 0$  by drawing its graph for  $-3 \leq x \leq 2$ .

Solution: Rewrite the quadratic equation  $x^2 + x - 3 = 0$  as the quadratic function  $y = x^2 + x - 3$ . Draw the graph for  $y = x^2 + x - 3$ .
