Prince Harry (pictured, left and right),36, was spotted volunteering for a non-profit foundation providing COVID-19 support for veterans and their families, and at-risk communities in Compton last ...

In a book that marks the author's 20th year of uncovering suppressed information, he takes the manipulation of the human race and the nature of reality to new levels of understanding and calls for humanity to rise from its knees and take back the world from the sinister network of families and non-human entities that covertly control us from cradle to grave. Original.

In Thomas Ligotti's first nonfiction outing, an examination of the meaning (or meaninglessness) of life through an insightful, unsparing argument that proves the greatest horrors are not the products of our imagination but instead are found in reality. "There is a signature motif discernible in both works of philosophical pessimism and supernatural horror. It may be stated thus: Behind the scenes of life lurks something pernicious that makes a nightmare of our world." His fiction is known to be some of the most terrifying in the genre of supernatural horror, but Thomas Ligotti's first nonfiction book may be even scarier. Drawing on philosophy, literature, neuroscience, and other fields of study, Ligotti takes the penetrating lens of his imagination and turns it on his audience, causing them to grapple with the brutal reality that they are living a meaningless nightmare, and anyone who feels otherwise is simply acting out an optimistic fallacy. At once a guidebook to pessimistic thought and a relentless critique of humanity's employment of self-deception to cope with the pervasive suffering of their existence, The Conspiracy against the Human Race may just convince readers that there is more than a measure of truth in the despairing yet unexpectedly liberating negativity that is widely considered a hallmark of Ligotti's work.

This book is more than an overview of race. While it includes haplographic studies and ancestry tracing, there is still a lot that is unknown about who we are as a HUMAN race. The story begins with the first people who lived with dinosaurs and the massive mutations occurring 5 thousand and 10 thousand years ago. Why these happened are important when tracing our ancestry. This study does not cover the near term expansion and massive mixing of races. What it does is look for beginnings and endings. Both suggest mutation, separation, migration, and adaptation in a world that is just a changing as race.

Our world is seeded with landmine of hate, moral deficienciis, inequalities, and collaboration with evil! The greatest enemy of the human race, a major roadblock to genuine integration, equality, and peaceful coexistence is hate and the spread of it.

A New York Times Notable Book of 2014 We are doomed to repeat history if we fail to learn from it, but how are we affected by the forces that are invisible to us? What role does Neanderthal DNA play in our genetic makeup? How did the theory of eugenics embraced by Nazi Germany first develop? How is trust passed down in Africa, and silence inherited in Tasmania? How are private companies like Ancestry.com uncovering, preserving and potentially editing the past? In The Invisible History of the Human Race, Christine Kenneally reveals that, remarkably, it is not only our biological history that is coded in our DNA, but also our social history. She breaks down myths of determinism and draws on cutting - edge research to explore how both historical artefacts and our DNA tell us where we have come from and where we may be going.

This book relates the current, insidious plight facing the human race as a direct result of a grand deception that has been imposed upon it for tens of thousands of years if not longer. This has been perpetrated by the systematic, ongoing falsification of history in much the same way as perpetrated by the powers that be in the suspiciously prophetic novel \1984], by George Orwell. We have all been deceived on a monumental scale by a tiny clique of people who by their own birthright and bloodlines absolutely believe that they have the divine right to rule over us by whatever method best suits their purposes. In order to achieve this they have lied, deceived, murdered and even committed genocide down the millennia in an attempt to bring their ultimate goal to fruition. Find out about the use of drugs, vaccinations, micro-chipping, mind control, trans-humanism and 24/7 distractions such as non-stop sports, entertainments and the invasive \celebrity culture] that attempts to pervade our whole lives.

This fully illustrated, large format book, explores human achievements and the desire to be the first, the fastest, the best in history.

What might life, technology, and the world be like in the future? Today's future is tomorrow's reality-- the future is on its way! Twenty-nine complete, independently readable chapters of valuable and stimulating information on what could happen, when, and in some cases even how to prepare. Contains "some of the most readable (and movie-ready) scientific literature ever published" - Neal Ungerleider, writer, FAST COMPANY. You will get an engaging and thought provoking ride. In future scenarios written to make science and technology readable and intriguing, the author weaves imagination, science, and even occasional dry humor into a gripping whole. The possible future realities described in these speculative essays, with time scales ranging from the current century to nearly eternity, may inspire readers young and old, even thinkers, writers and leaders. Updated edition. Includes over 400 references and links to more information. Peer reviewed for scientific accuracy. Here are just some of the topics you will read about: A week's worth of food can be produced with just one hour of labor, so could we all have lives of leisure? Cognitive enhancement the easy way: from pills to ultrasound to electrical stimulation and more. When computers can read our minds we won't need WIMP (windows-icons-mouse-pointer) based computers any more. A telepresence robot is a long distance extension of yourself, and some day could allow you to work anywhere while living wherever you want. Colonizing the moon, Mars, and other planets and moons is possible in principle, so how might we actually do it? "It doesn't grow on trees" is a problem whose future solution is genetically engineered trees. An asteroid ended the dinosaurs and one could end us too, but there are ways to protect against them. These topics and many more (32 independent essays, mostly but not exclusively nonfiction) describe what could happen--and in many cases, what we can do. "... could inspire ... students to be more creative, their parents and grandparents to be more future aware, and leaders of nations around the world to take heed and act." --Donald Maclean, MBChB "As a technology futurist I am extremely interested in the topics of this book. Thank you so much for writing this excellent book!!" --Elina Hiltunen, PhD, CEO "... whizzes past the future and then loops back to look it in the eye. This is a ... brilliant book." --Sabiha Rumani Malik, President of Sanghata Global "I have been pleasantly surprised at the quality and depth of the material in this book." --Luke Hutchison, PhD (MIT), Google; TED fellow; Singularity University alumnus "Although many foresight and futurism books belong in the science fiction section, Berleant grounds his writing in scientific facts and knowledge, while maintaining the excitement the material deserves. ... the book can expand your view of the possible." --33rd Square

H. Beam Piper's sequel to the science fiction classic Little Fuzzy. The small fuzzy species discovered on the planet Zarathustra has been declared sapient, but now that the Fuzzies are protected by law, the humans who have colonized Zarathustra have to figure out how to live with them...
