Hungerford's Algebra and Rotman's Advanced Modern Algebra. I developed the solutions as a preparation for the Ph.D. qualifying exams. With the exception of some parts of chapter 2, most of the solutions have been proof read to some degree. However, mistakes are bound to exist still. My hope is that these may help others with many of the common problems encountered when preparing for ...

Finally a self-contained, one volume, graduate-level algebra text that is readable by the average graduate student and flexible enough to accommodate a wide variety of instructors and course contents. The guiding principle throughout is that the material should be presented as general as possible, consistent with good pedagogy. Therefore it stresses clarity rather than brevity and contains an extraordinarily large number of illustrative exercises.

Finally a self-contained, one volume, graduate-level algebra text that is readable by the average graduate student and flexible enough to accommodate a wide variety of instructors and course contents. The guiding principle throughout is that the material should be presented as general as possible, consistent with good pedagogy. Therefore it stresses clarity rather than brevity and contains an extraordinarily large number of illustrative exercises.

Thomas Hungerford's CONTEMPORARY COLLEGE ALGEBRA AND TRIGONOMETRY is known and well respected for its thorough integration of the graphing calculator, clear writing, and outstanding applications problems. Many adopters laud the use of real data in examples and exercises, and they appreciate the flexibility of the book's organization. This market-leading text is now accompanied by an outstanding array of innovative supplements that facilitate teaching and enhance learning, such as iLrn--a robust suite of online course management, testing, and tutorial resources for instructor and student, with vMentor live online tutoring. The text also includes the free Interactive Video Skillbuilder CD-ROM with MathCue, and a Book Companion Web Site featuring online graphing calculator resources.

Abstract Algebra: An Introduction is set apart by its thematic development and organization. The chapters are organized around two themes: arithmetic and congruence. Each theme is developed first for the integers, then for polynomials, and finally for rings and groups. This enables students to see where many abstract concepts come from, why they are important, and how they relate to one another. New to this edition is a groups first option that enables those who prefer to cover groups before rings to do so easily. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The student solutions manual provides worked-out solutions to the odd-numbered problems in the text. This manual also contains useful study tools, such as practice tests and key formulas and concepts summarized at the end of each chapter.

Many basic ideas of algebra and number theory intertwine, making it ideal to explore both at the same time. Certain Number-Theoretic Episodes in Algebra focuses on some important aspects of interconnections between number theory and commutative algebra. Using a pedagogical approach, the author presents the conceptual foundations of commutati
