This course is also available as self-paced virtual (e-learning) course IBM Integration Bus V10 Application Development II (ZM676G). This option does not require any travel. This course provides an intermediate-level continuation of the topics necessary to successfully create IBM Integration Bus message flow applications and integration services.

IBM Integration Bus V10 Application Development II ...

This intermediate course is designed for integration specialists and senior-level developers with experience in IBM Integration Bus application development. Pre-requisite Before taking this course, you should

successfully complete IBM Integration Bus V10 Application Development I (WM666G), which introduces IBM Integration Bus development topics that are necessary for success in this course.

IBM Integration Bus V10 Application Development II (ZM676G)
Learn how to install WebSphere MQ for Developers for use with IBM Integration Bus for Developers version 10, to be able to exploit features of WebSphere MQ: download and then install WebSphere MQ, through to testing use of MQ features, all in minutes. Download.

App Connect - IBM Middleware User Community (IMWUC)
IBM Integration Bus V10 introduces application isolation for Java, and

enables this support by default for all new applications. This support has also been back ported and released as part of fix pack 3 for V9 (V9.0.0.3), but in V9 the support is disabled by default to avoid changing behaviour as part of a fix pack upgrade.

App Connect - IBM Middleware User Community

IBM Integration Bus v10 is now available for use in patterns on PureApplication System and in the cloud on the SoftLayer PureApplication service. The pattern components for IBM Integration Bus v10 provide a repeatable, automated way to define and deploy single or multi-VM patterns which include IBM Integration Bus v10.

New PureApplication pattern for IBM

Integration Bus v10 ... elopment I
Configure IBM Integration Bus on the
Windows server. To configure IBM
Integration Bus on the Windows
server: Create the IIBV10 Integration
node, where IIBV10 is the broker
name and the Integration node does
not have any queue manager
dependency: mqsicreatebroker IIBV10

Configure MQ connections between
IBM Integration Bus v10 ...
When installing IBM Integration Bus
V10.0.0.0 or V10.0.0.1, you manually
changed the installation directory and
specified the same directory as is used
by an existing V10.0 installation. This
appears to work until you uninstall one
of the two installations, and the other
one is then left unusable because
some files are missing.

release notes

IBM Integration Bus V10 Workshop January 2016 ... is defined in this section, however no applications or services are configured to use the certificates defined in the PKI. In an ideal situation it is easier to resolve non security related problems without security working. At the end of this part the

IBM Integration Bus

IBM Integration Bus (IIB) v10 was launched in March 2015 and continues to provide a universal, independent platform to integrate disparate systems. We've already written articles about what is new in this version, but we also want existing integration solutions to work seamlessly on the new version.
