Financial Risk Management and Derivative Instruments offers an introduction to the riskiness of stock markets and the application of derivative instruments in managing exposure to such risk. Structured in two parts, the first part offers an introduction to stock market and bond market risk as encountered by investors seeking investment growth. The second part of the text introduces the financial derivative instruments that provide for either a reduced exposure (hedging) or an increased exposure (speculation) to market risk. The fundamental aspects of the futures and options derivative markets and the tools of the Black-Scholes model are examined. The text sets the topics in their global context, referencing financial shocks such as Brexit and the Covid-19 pandemic. An accessible writing style is supported by pedagogical features such as key insights boxes, progressive illustrative examples and end-of-chapter tutorials. The book is supplemented by PowerPoint slides designed to assist presentation of the text material as well as providing a coherent summary of the lectures. This textbook provides an ideal text for introductory courses to derivative instruments and financial risk management for either undergraduate, masters or MBA students.

A small, poor, little-known nation, the Central African Republic has had a troubled history, from the days of slave raids by Arab-speaking peoples from the north, through the bizarre rule of Jean-Bedel Bokassa, to the present military regime. Landlocked and possessing few resources beyond its famed diamonds, it is one of the least developed nations in Africa. Since its independence from France in 1959, it has of necessity continued to depend on its former colonial ruler. In this introduction to the Central African Republic, Dr. O'Toole examines the country's tumultuous past and current difficulties, the nature of the present political situation, and the roots of that situation in the colonial and precolonial periods. He also focuses on the roles of ethnicity, emerging urban problems, class formation, education, and religion in the social and cultural changes that the nation is currently undergoing. Finally, he realistically assesses the viability of the present government as a vehicle for economic development, stability, and reform.
