This volume will enable the reader to successfully undertake pre-project evaluations, especially in the areas of refining and petrochemistry. It encompasses all the essential steps: market analysis, comparative studies of technical and economic issues, sensitivity studies, sizing and costing of the equipment required for an industrial-scale plant, estimation of capital spending, calculation of costs and sales prices, etc. The first edition of this manual proved to be a very valuable teaching tool for universities and advanced engineering and business schools, both in France and abroad. It is essential for the rapid evaluation of the cost and profitability of proposed plants and of those already in operation. It has been widely used by engineers, consulting firms, and corporate research and development departments. Its status as the only current publication that covers all the steps involved in the economic evaluation of projects will render it particularly valuable to its users. It will quickly become indispensable to everyone whose job it is to evaluate the economic impact of the development, cancellation or reorientation of a project.Contents: 1. Market analysis. 2. The elements of economic calculation. 3. The determination of battery limits investments. Appendix 1. Functional modules method (FMM). Appendix 2. PrE-estime method. Bibliography. Index

Relive the grandeur and romance of the greatest of all legends - the story of King Arthur. Assume the role of a knight starting his career in the time of Uther Pendragon, undertaking quests and perilous adventures for your lord, for your lady-love, for the Church, or for your own glory. Win great renown with your laudable deeds and feats of arms, perhaps even winning the right to carve your name into the Round Table itself as the story of Arthur and Camelot unfolds around you.
