Businesses today are no more confined to national boundaries and have become truly international. It concludes with an analysis of international financial institutions and their functioning, the participants and instruments of global financial markets where international funds are raised, the many uses of international funds in the form of portfolio investments, and direct investments in host countries. The book is primarily intended as a text for postgraduate students of commerce and management, chartered accountancy (CA) and chartered financial analysis (CFA). It would also be of immense value to practising professionals in the field of international finance. Key Features : Illustrates the concepts with the help of examples, figures and tables.
