requirements of IEC 60664-1 or IEC 60664-5 apply. This standard refers only to permanent protection. It does not cover assemblies after repair. Technical committees need to consider the influence on the protection of overheated conductors and components, especially under fault conditions, and to decide if any additional requirements are necessary.

International Iec Standard 60664 1 - mallaneka.com

This is an incomplete list of standards published by the International Electrotechnical Commission (IEC).. The numbers of older IEC standards were converted in 1997 by adding 60000; for example IEC 27 became IEC 60027. IEC standards often have multiple sub-part documents; only the main title for the standard is listed here.

List of International Electrotechnical Commission standards

NOTE 1 When reference is made to Part 1 or Part 5, IEC 60664-1 or IEC 60664-5 are meant. This standard describes the requirements and test procedures for two methods of protection: – type 1 protection improves the microenvironment of the parts under the protection; – type 2 protection is considered to be similar to solid insulation.
