Dr. Michelle Harris, Dr. Janet Batzli, Biocore. This section provides guidelines on how to construct a solid introduction to a scientific paper including background information, study question, biological rationale, hypothesis, and general approach. If the Introduction is done well, there should be no question in the reader ' s mind why and on what basis you have posed a specific hypothesis.

~~Writing an Introduction for a Scientific Paper—Writing ...~~

It is what an introduction does to present the motivation behind scientific research and give it value that is so appealing, just as it is the way in which a conclusion interprets the findings of scientific research in relation to the motivation offered in the introduction that causes many readers to flip from introduction directly back to the conclusion before reading the scientific heart of a paper. An effective introduction to a scientific paper will usually provide the background or ...

~~How Do I Write the Introduction for My Scientific Paper or ...~~

The scientific paper has developed over the past three centuries into a tool to communicate the results of scientific inquiry. The main audience for scientific papers is extremely specialized. The purpose of these papers is twofold: to present information so that it is easy to retrieve, and to present enough information that the reader can duplicate the scientific study.

~~Guide: Writing the Scientific Paper~~

The introduction is where you sketch out the background of your study, including why you have investigated the question that you have and how it relates to earlier research that has been done in the field.

~~Introduction~~

Every scientific paper is structured the same way. It starts with an abstract that briefly summarizes the paper and then leads into an introduction. The materials and methods come next, followed by the results. The paper concludes with the discussion section and a list of references.

~~How to Write a Scientific Paper (with Pictures)—wikiHow~~

The Sections of the Paper Most journal-style scientific papers are subdivided into the following sections: Title, Authors and Affiliation, Abstract, Introduction, Methods, Results, Discussion, Acknowledgments, and Literature Cited, which parallel the experimental process. This is the system we will use.

~~Journal-Style Scientific Paper—Bates College~~

All scientific papers have the same general format. They are divided into distinct sections and each section contains a specific type of information. The number and the headings of sections may vary among journals, but for the most part a basic structure is maintained. Typically, scientific papers are comprised of the following parts:

~~Sections of a Paper: Structure of a Scientific Paper~~

Your introduction should define the topic, consist of a context and rationale, as well as of a hypothesis and research questions. A thoughtful introduction sets a tone for the whole paper, grabs attention of the reader and provides thesis statement and hypothesis.
