The Journal of a
Disappointed Man. W. N. P.
Barbellion This Journal,
which Barbellion (real name
the rather less sonorous
Bruce Cummings) began as a
precocious teenager in 1903,
traces the tragically short
life of its author until his
death in 1919 and is
something of a cult classic.

The Journal of a Disappointed Man - Wikipedia

Within 'From the Journal of a Disappointed Man' Motion explores themes of labor, the purpose (or futility) of life, and manhood. The mood is contemplative and calm as the speaker describes the men, their actions, and the pier they are building. A reader is asked to consider the purpose of their work, where it concludes, and the differences between the onlooker and the men he studied.

'From the Journal of a Disappointed Man' is a poem by Andrew Motion which considers the role of men within society, and interactions between men based on their different livelihoods and perspectives. Motion is an English poet, who was previously the UK's Poet Laureate between 1999 and 2009. He focuses on his aim to "write in clear language" (a quality which can be seen in this poem), while his

Barbellion, unique philosophy and personal resignation, was described by its author as "a study in the nude". The book received both adulatory and scathing reviews; Collins , having originally optioned the book, eventually rejected it because they feared the "lack of morals" shown by Barbellion would damage their reputation.

profound introspection. The first edition contains a preface by H. G. Wells, which caused many people think it a work of fiction; however, Well's dispelled this rumour even though the true identity of its author was unknown until his death. A fascinating and unique volume, "The Journal of a Disappointed Man" constitutes a must-read for all lovers of non-fiction and would make for a worthy addition to any collection. Bruce Frederick Cummings (1889 - 919) was an English diarist most famous for this work. Many vintage books such as this are becoming increasingly scarce and

Multiple sclerosis (MS) is an autoimmune disease of unknown aetiology that affects the white matter of the central nervous system (CNS). The symptoms of multiple sclerosis are diverse, depending on the location and size of the CNS inflammatory lesions (plaques). MS is divided into subtypes: relapsing-remitting, secondary progressive and primary progressive. The relapsing-remitting form is the most common. MS is diagnosed on the basis of clinical presentation, cerebrospinal fluid (CSF) examination and magnetic resonance imaging

(MRI). Pulse corticosteroid therapy is used to manage acute exacerbations. The first-line disease-modifying agents indicated for long-term therapy are interferon beta and glatiramer acetate. Natalizumab or fingolimod are used in particularly aggressive disease forms. No curative therapy exists as yet. Disease progress is individual. According to current estimations, MS decreases the patient's life expectancy by about 7 years.
