report writing. This sixth edition is fully revised and updated to accommodate changes to IBM SPSS procedures, screens and output. It covers new SPSS tools for generating graphs and non-parametric statistics, importing data, and calculating dates. 'An excellent introduction to using SPSS for data analysis. It provides a self-contained resource itself, with more than simply (detailed and clear) step-by-step descriptions of statistical procedures in SPSS. There is also a wealth of tips and advice, and for each statistical technique a brief, but consistently reliable, explanation is provided.' - Associate Professor George Dunbar, University of Warwick 'This book is recommended as ESSENTIAL to all students completing research projects - minor and major.' - Dr John Roodenburg, Monash University

As the population ages and more people with disabilities seek to drive, occupational therapists will increasingly need to address this instrumental activity of daily living with their clients. The OT-DORA Battery is a unique, user-friendly, and convenient collection of assessments that allows efficient evaluation of an individual's cognitive, perceptual, behavioral, physical, and sensory skills and abilities that are related to driving, prior to an on-road assessment. The OT-DORA also offers the ability to screen clients who are unsafe to take an on-road assessment. Done easily in a clinical setting, without driving simulators or taking the client on-road, the
