KENWOOD TM-D700A Extended TX MOD (easy 3 steps) Just received my new rig, neither the supplier nor Kenwood had the mods available to date. Remove the bottom cover, 5 screws (not the speaker side). Locate and remove "W601" (chip resistor) and "W602" (green wire). They are located within 2 inches of the optional VS-3 voice synthesizer board.

Have Kenwood D710A ----> Radio Shack (Delorme) DigiTraveler Also have a Kenwood D7A Had Yaesu FT-8800R ----> Tiny Trak3 ----> DigiTraveler If you plan to really USE APRS you want the Kenwood D710 or D700. If you only want to be seen then go with a tracker system. You get the best bang for the buck going with a real APRS radio though.

Kenwood D710 software works well on a Windows 8 tablet allowing me to easily clone the radios. I installed a VGS1 voice module as well and enjoy the features that offers. It even speaks Japanese on the voice guide, if selected, keeping me up to speed. Crossband operation is plenty of fun and the D710 makes it easy.
