Hank Hanegraaff reveals the code to Revelation. Breaking the code of the book of Revelation has become an international obsession. The result, according to Hank Hanegraaff, has been rampant misreading of Scripture, bad theology, and even bad politics and foreign policy. Hanegraaff argues that the key to understanding the last book of the Bible is the other sixty-five books of the Bible — not current events or recent history and certainly not any complicated charts. The Apocalypse Code offers sane answers to some very controversial questions: What does it mean to take the book of Revelation (and the rest of the Bible) literally? Who are the "Antichrist" and the "Great Whore of Babylon,"and what is the real meaning of "666"? How does our view of the end times change the way we think about the crisis in the Middle East? Are two-thirds of all Jews really headed for an apocalyptic holocaust? The Apocalypse Code is a call to understand what the Bible really says about the end times and why how we understand it matters so much in today's world. "Provocative and passionate, this fascinating book is a must-read for everyone who's interested in end-times controversies." — Lee Strobel, Author, The Case for the RealJesus "This book is a withering and unrelenting critique of the positions of apocalyptic enthusiasts such as Tim LaHaye. Every fan of theLeft Behindseries should read this book. The fog will clear, and common sense will return to our reading of the Bible." — Gary M. Burge, Professor of New Testament, Wheaton College and Graduate School

Textile Conservator's Manual

This second edition of 'Textile Conservator's Manual', now revised and available in paperback, provides an in-depth review of the current practice, ethics and materials used in textile conservation. Concentrating on decorative art objects from the major cultures, the book gives practical instruction and a wide variety of case histories. While the format has been simplified, the text has been expanded and updated to include changes brought about by recent developments in the conservation of material. This new information will increase the reader's ability to interpret signs of ageing and past activity on the object. New case histories in Part Two represent major investigations into the technical history. A basis is provided from which to develop practical skills, taking into account the needs of the object, its essential characteristics of appearance and, above all, its structure. The book covers a wide range of decorative objects, from a fragment of linen 4000 years old to a theatrical backcloth of the twentieth century. This book is practical and thought-provoking, not only about what is being done and how, but also why.

Evangelical and Feminist Approaches to Old Testament Interpretation

Evangelical and feminist approaches to Old Testament interpretation often seem to be at odds with each other. The authors of this volume argue to the contrary: feminist and evangelical interpreters of the Old Testament can enter into a constructive dialogue that will be fruitful to both parties. They seek to illustrate this with reference to a number of texts and issues relevant to feminist Old Testament interpretation from an explicitly evangelical point of view. In so doing they raise issues that need to be addressed by both evangelical and feminist interpreters of the Old Testament, and present an invitation to faithful and fruitful reading of these portions of Scripture.

The Moon-Crossed Lovers

The story continues with the trials that interrupt Adelina and Demitrey's "Happy ever after". Our fearless leaders are faced with both new and old enemies. Some they can see, and others they cannot. When the Past comes back to haunt them, Demitrey must learn what it really means to be an Alpha, while he finds himself growing into the husband and father he was meant to be. Adelina gains a first seat glimpse into Demitrey's past, but that's not the only past she had to revise, in order to know her full potential as Luna.Together they must risk everything by taking on an enemy that could destroy everything they worked for, not to mention the possibility of the leaders losing themselves along they way. Yet, they risk it all for the sake of their Daughter, family and pack. They must also risk everything to achieve the impossible: A true alliance between a werewolf Pack and a Vampire clan. New treaties and new enemies. Old foes and new battles. Aged scars, and new battle wounds. What could once be trusted, was now in question. And what was once believed to be real, turned out to be the complete opposite. These moon crossed lovers find themselves so close to peace, yet so far.New relations, and deadly betrayals. Love. War. Temptation. Lust. Blood shed. All the ingredients needed for the thrilling roller coaster that is Demitrey's and Adeilna's lives.Join these Moon-crossed Lovers on yet another adventure, and buckle up, it's going to be a bumpy ride.*This story has been revised and edited**This story follows the sequel "His Mate and His Mistress: The Rise of a Luna**This story is the third installment in the "His Mate and His Mistress" series*

Why is Psychiatry Such a Big Business?

Why is psychiatry such big business? Why are so many psychiatric drugs prescribed – 47 million antidepressant prescriptions in the UK alone last year – and why, without solid scientific justification, has the number of mental disorders risen from 106 in 1952 to 374 today? The everyday sufferings and setbacks of life are now 'medicalised' into illnesses that require treatment – usually with highly profitable drugs. Psychological therapist James Davies uses his insider knowledge to illustrate for a general readership how psychiatry has put riches and medical status above patients' well-being. The charge sheet is damning: negative drug trials routinely buried; antidepressants that work no better than placebos; research regularly manipulated to produce positive results; doctors, seduced by huge pharmaceutical rewards, creating more disorders and prescribing more pills; and ethical, scientific and treatment flaws unscrupulously concealed by mass-marketing. Cracked reveals for the first time the true human cost of an industry that, in the name of helping others, has actually been helping itself.

Organisational Goals and Stakeholders

Focuses on organisational goals and those of other stakeholders and society at large. This book provides an insight into the potential benefits and pitfalls, expectations and concerns of advancing a critical view of HRD in practice. It is intended for lecturers, students and practitioners who are aching for a critical analysis.

A Special Holiday Collection of Fiction and Nonfiction

A special holiday collection of fiction and nonfiction by classic and contemporary regional authors celebrates Christmas with Jane Smiley's "Long Distance," "The Living Crêche" by Mary Swander, Mari Sandoz's "The Christmas of the Phonograph Records," and other works by Willa Cather, Hamlin Garland, Paul Engle, Constance Vogel, and Tom Kooser, among others.

Proteomics: A New Key for the Functional Analysis of Living Systems

As research on the human, animal, plant and microbial genomes matures towards descriptive fullness, the need for understanding the proteome has clearly emerged as the next major endeavor of life sciences. Proteomics - the quantitative analysis of all proteins working in a cell at a specific time and at specific conditions - provides deep insight into the highly organized network of expression, modification and degradation of proteins. Compiled in this book are reviews and research articles which describe the recent advances and perspectives of this new field of research. The articles are grouped into the following sections: - Sample Preparation and Solubilization - Developments in Electrophoresis - Detection and Quantitation - Mass Spectrometry - Proteome Data Analysis and Management - Prokayotes and Yeast - Biological Fluids - Eukaryotic Cells and Tissue - Oncology - Plants Proteomics is a new key for the functional analysis of living systems and of equal importance for basic as well as application oriented research.
