New winds are blowing across the face of organizational life—business, education, religion, and government. As a current or aspiring leader, you must be aware of the direction and force of that wind. You must recognize the dangers, maintain balance, and discover how to transform organizations and followers into productive entities and people. You must lead with integrity and skill. To do so, a revolution in organizational thinking and modeling is needed. Organizations must be flexible, porous, adaptive, and fleet-of-foot. Every person is expected to hustle, chart new courses, and be engaged fully with swift, stimulating actions—constantly improving everything. Because of so many changes and new expectations, it is necessary for all leaders to reevaluate their skills. Phillip V. Lewis takes today's leaders to the new basics, addressing leadership traits and styles, the challenges currently being faced, and the strategies essential to effective leadership in a constantly changing world. Personal experiences, examples from major companies, and extensive research make ideas and methods of implementation clear so you can start changing the game immediately. Revolutionary changes are occurring in the world today that will forever alter the way leaders meet the needs of their followers and stakeholders. You must question the status quo and dare to change or become obsolete. You must go From Boardroom to Whiteboard.

The scientific field of leadership and followership is fast evolving and has seen

several interesting developments over recent years. The early heroic views of leadership are slowly turning into more nuanced perspectives, including the understanding that leadership and followership are mutually dependent on each other. Likewise, there is a growing awareness that the focus on the positive side of leadership and followership can be fruitfully complemented by a focus on the darker sides of these constructs. According to the latest research plenty of "grey areas" exist, where further insights into leadership and followership are needed. We seek to emphasize the different shades of dark leadership by taking leaders, followers, and their interaction in specific contexts into account. Accordingly, many of the findings presented in this Research Topic align with a deviation away from the idea of the omnipotent leader. Not only leaders' dark traits such as narcissism and psychopathy, but also followers' Machiavellianism emerged as hindering factors for positive organizational functioning. Other results presented in this Research Topic will be fruitful to explain what drives leaders towards dark-side behaviors, the consequences of dark-side leader behaviors (e.g., different types of destructive leadership), and how followers respond to them (e.g., follower attributions of perceived abusive supervision). Contributions to this Research Topic are also pushing the boundaries of current theorizing, shedding further light on the "shades of grey," when it comes to the possibly unintended negative consequences of leadership and followership. In sum, the dark sides of leadership and followership are a natural part of an organizational reality that many employees face day in and day out. The aim of this Research Topic is to encourage

an integrative view of leadership and followership and their dark sides, for a better understanding of complex organizational systems and implications for better practice.

Various definitions of leadership have transformed the way that educators around the world think about teaching, administration, and policy over the years. This title investigates the changing face of educational leadership from comparative and international perspectives.

This comprehensive handbook is the ultimate reference work, providing authoritative and international overviews of all aspects of schools and schooling in Asia. Split into 19 sections it covers curriculum, learning and assessment, private supplementary tutoring, special education, gender issues, ethnic minority education and LGBTQI students in Asian schools. The volume displays the current state of the scholarship for schools and schooling in Asia including emerging, controversial and cutting-edge contributions using a thematic approach. The content offers a broad sweep of the region with a focus on theoretical, cultural and political issues as well as identifying educational issues and priorities, such as curriculum, assessment, teacher education, school leadership, etc., all of which impact students and learning in multiple ways. The Routledge International Handbook of Schools and Schooling in Asia brings together experts in each area to contribute their knowledge, providing a multidimensional and rich view of the

justice, advocacy and advocates for social justice, socio-cultural representations of social injustices, glocal policies, and leadership development as interventions. The Handbook is as much forward-looking as it is a retrospective review of educational research literatures on social justice from a variety of educational subfields including educational leadership, higher education academic networks, special education, health education, teacher education, professional development, policy analyses, and multicultural education. The Handbook celebrates the promises of social justice while providing the educational leadership research community with concrete, contextualized illustrations on how to address inequities and combat social, political and economic injustices through the processes of education in societies and educational institutions around the world.

Reflecting advances in theory, research, and application in the discipline since the publication of the Handbook of Public Relations in 2001, this new volume is global in scope and unmatched in its coverage of both academic research and professional best practice. It presents major theories in the words of the leading advocates for each theory; positions public relations as a positive force to help make society more fully functional; and challenges academics and practitioners to identify best practices that can inform the work of those in the profession.

In the past 40 years there have been a number of significant developments across the fields of educational administration and history. In this volume, the authors

have selected a number of key issues to illustrate and trace these changes. The seven articles by leading scholars in the field offer an analysis of contemporary educational administration, history and policy debates and how this has impacted on teachers, leaders, schools and the education sector. This book offers readers a valuable insight into continuing and contemporary debates in the field and the authors offer a refreshing interpretation of these debates. This book provides a rich analysis from a range of theoretical, methodological perspectives and highlights the extent to which these debates remain a contemporary concern. This book was published as a special issue of the Journal of Educational Administration and History.

If historians were once preoccupied with politics, they are no more. In the past century history has embraced the whole range of human activity. Yet historians cannot, or at least ought not, avoid politics. Aristotle was right: humans are by nature political beings and politics is naturally an essential human activity. Whatever else history must do, then, it needs always to take politics into account. The Norwegian-American Historical Association is therefore pleased to publish Jorn Brondal's study of Scandinavian-Americans in politics. His book is noteworthy for its emphasis on the role played in American politics by cohorts of ethnic leaders. It is also an able contribution to an undeveloped field, the comparative study of Scandinavian ethnic groups in the United States. In these respects his work complements other studies, including a number published by the Association itself,

that have emphasized popular involvement in Norwegian-American politics or the careers in politics of single individuals.
