Yet this posthumous publication of his College de France lectures 1975-76 approximates one. Here one can find the most elaborate discussion of the distinction between power-as-law and power as a bunch of local techniques and force relations, and more important, the idiosyncratic conceptualization of political power based on the model of war.

These lectures delivered over 3 years at the College de France expose the state - and our abiding belief in it - as a 400-year old political fiction brought to life by its many agents through their collective acts done in the name of the state. If this sounds tautological, it is - the state exists because we act as if it does.

The book is a compilation of lectures Bourdieu delivered at the Collège de France between the years 1989 and 1992. Running the risk of missing out on the aural attributes of the lectures, the editors, instead of merely transcribing them, have revised, with complete fidelity to the author, the spoken discourse toward producing a "complete readable text" for the readers.

Michel Foucault's 13 years of lectures at the Collège de France (1970-1984) introduced us to new concepts and novel research avenues. For many of us, those avenues have been fertile ground for our own theorization, for others, fertile ground for critique. They represent, as Foucault intended, rich and productive *«pistes de recherches»*.

Michel Foucault remains one of the towering intellectual figures of the last half century. Michel Foucault's works on sexuality, madness, the prison and medicine are classics and his example continues to challenge and inspire. The philosopher gave public lectures at the College de France from 1971 until his death in 1984 - these lectures were seminal events and created benchmarks for contemporary critical inquiry. The lectures comprising "Abnormal" begin by examining the role of psychiatry in modern criminal justice and its method of categorizing individuals who "resemble their crime before they commit it." Michel Foucault shows how and why defining "abnormality" and "normality" were prerogatives of power in the 19th century and shaped the institutions. The College de France lectures add to our appreciation of the philosopher's thought and offer a unique window into his way of thinking

In the first of his annual series of lectures at the Collège de France, Foucault develops a vigorous Nietzschean history of the will to know through an analysis of changing procedures of truth, legal forms, and class struggles in ancient Greece.

Exploring the interrelationship between war and politics, a series of lectures by the late French philosopher traces the evolution of a new understanding of society and its relation to war, revealing war as the permanent basis of all institutions of power. Reprint. 15,000 first printing.

Foucault continues on the theme of his 1978 course by focusing on the study of liberal and neo-liberal forms of government and concentrating in particular on two forms of neo-liberalism: German post-war liberalism and the liberalism of the Chicago School.

«The working hypothesis is this: it is true that sexuality as experience is obviously not independent of codes and systems of prohibitions, but it needs to be recalled straightaway that these codes are astonishingly stable, continuous, and slow to change. It needs to be recalled also that the way in which they are observed or transgressed also seems to be very stable and very repetitive. On the other hand, the point of historical mobility, what no doubt change most often, what are most fragile, are modalities of experience.» - Michel Foucault In 1981 Foucault delivered a course of lectures which marked a decisive reorientation in his thought and of the project of a History of Sexuality outlined in 1976. It was in these lectures that arts of living became the focal point around which he developed a new way of thinking about subjectivity. It was also the

moment when Foucault problematized a conception of ethics understood as the patient elaboration of a relationship of self to self. It was the study of the sexual experience of the Ancients that made these new conceptual developments possible. Within this framework, Foucault examined medical writings, tracts on marriage, the philosophy of love, or the prognostic value of erotic dreams, for evidence of a structuration of the subject in his relationship to pleasures (aphrodisia) which is prior to the modern construction of a science of sexuality as well as to the Christian fearful obsession with the flesh. What was actually at stake was establishing that the imposition of a scrupulous and interminable hermeneutics of desire was the invention of Christianity. But to do this it was necessary to establish the irreducible specificity of ancient techniques of self. In these lectures, which clearly foreshadow *The Use of Pleasures* and *The Care of Self*, Foucault examines the Greek subordination of gender differences to the primacy of an opposition between active and passive, as well as the development by Imperial stoicism of a model of the conjugal bond which advocates unwavering fidelity and shared feelings and which leads to the disqualification of homosexuality.

These thirteen lectures on the 'punitive society,' delivered at the Collège de France in the first three months of 1973, examine the way in which the relations between justice and truth that govern modern penal law were forged, and question what links them to the emergence of a new punitive regime that still dominates contemporary society. Praise for Foucault's Lectures at the Collège de France Series "Ideas spark off nearly every page...The words may have been spoken in [the 1970s], but they seem as alive and relevant as if they had been written yesterday." "Bookforum "Foucault is quite central to our sense of where we are...[He] is carrying out, in the noblest way, the promiscuous aim of true culture." "The Nation "[Foucault] has an alert and sensitive mind that can ignore the familiar surfaces of established intellectual coded and ask new questions...[He] gives dramatic quality to the movement of culture." "The New York Review of Books

A historical investigation into the practice of psychiatric medicine in the western world chronicles its evolution, offering insight into how diagnoses and treatments changed throughout time and how modern social and political attitudes toward mental illness have developed, in a collection of philosophical lectures. Reprint. 15,000 first printing.

*The Hermeneutics of the Subject* is the third volume in the collection of Michel Foucault's lectures at the Collège de France, one of the world's most prestigious institutions. Faculty at the Collège give public lectures, in which they present works-in-progress on any subject of their choosing. Foucault's wide-ranging lectures influenced his groundbreaking works like *The History of Sexuality and Discipline and Punish*. In the lectures comprising this volume, Foucault focuses on how the "self" and the "care of the self" were conceived during the period of antiquity, beginning with Socrates. The problems of the ethical formation of the self, Foucault argues, form the background for our own questions about subjectivity and remain at the center of contemporary moral thought. This series of lectures throws new light on Foucault's final works and shows the full depth of his engagement with ancient thought. Lucid and provocative, *The Hermeneutics of the Subject* reveals Foucault at the height of his powers.

*Music Lessons* marks the first publication in English of a groundbreaking group of writings by French composer Pierre Boulez, his yearly lectures prepared for the Collège de France between 1976 and 1995. The lectures presented here offer a sustained intellectual engagement

with themes of creativity in music by a widely influential cultural figure, who has long been central to the conversation around contemporary music. In his essays Boulez explores, among other topics, the process through which a musical idea is realized in a full-fledged composition, the complementary roles of craft and inspiration, and the degree to which the memory of other musical works can influence and change the act of creation. Boulez also gives a penetrating account of problems in classical music that are still present today, such as the often crippling conservatism of established musical institutions. Woven into the discussion are stories of his own compositions and those of fellow composers whose work he championed, as both a critic and conductor: from Stravinsky to Stockhausen and Varèse, from Bartók to Berg, Debussy to Mahler and Wagner, and all the way back to Bach. Including a foreword by famed semiologist Jean-Jacques Nattiez, who was for years a close collaborator and friend of the composer, this edition is also enriched by an illuminating preface by Jonathan Goldman. With a masterful translation retaining Boulez's fierce convictions, cutting opinions, and signature wit, *Music Lessons* will be an essential and entertaining volume.
