LPIC-2 is an intermediate level certification. Candidates should be able to perform advanced system administration and manage networking as well as authentication and system security. Passing both exam 201 and exam 202 is required to earn this certification.This book primarily covers the 201 exam. You may see multiple choice questions as well as fill-in-the-blanks in these exams. We create these self-practice test questions referencing the concepts and principles currently valid in the exam. Each question comes with an answer and a short explanation which aids you in seeking further study information. For purpose of exam readiness drilling, this product includes questions that have varying numbers of choices. Some have 2 while some have 5 or 6. We want to make sure these questions are tough enough to really test your readiness and draw your focus to the weak areas. Think of these as challenges presented to you so to assess your comprehension of the subject matters. The goal is to reinforce learning, to validate successful transference of knowledge and to identify areas of weakness that require remediation. The questions are NOT designed to "simulate" actual exam questions. "realistic" or actual questions that are for cheating purpose are not available in any of our products.
