Select a 5-axis post processor and create NC code. The NC code is generated with respect to the B-axis coordinate system. Only a single touch-off is required to locate the part. The Rotary Center Offset values are contained in the post processor files. See five axis post processing variables for more information.

~~5-axis positioning using a single coordinate system ...~~

Port Machining uses 3-axis machining as far into the port as possible, and then switches to 5-axis motion. The system automatically overlaps top/bottom strategies to ensure smooth transitions where the tool paths meet. Both roughing and finishing tool paths are provided and stock can be represented as castings or billet.
