If you have ever wanted to write a song with your Kindergarten or Special Education class but did not want to get into the technical details of Music, then Composing With Kindergarten is the book for you! Here is a “fun and games” approach for instilling creativity and joy into your classroom, using color, rhythm, and sound to release the imagination of your students. Along with having a good time, children are also reinforcing English Language Arts, Math, and Science in auditory, visual, and kinesthetic ways. Any teacher – or parent - can use Composing With Kindergarten, not just the Music specialist. You will find that you are having fun along with your students!

A Modern Grammar for Biblical Hebrew is a complete revision of Duane Garrett’s respected 2002 release originally entitled A Modern Grammar for Classical Hebrew. In addition to the revisions and contributions from new coauthor Jason DeRouchie, the book now includes the answer key for an all-new companion workbook and an updated vocabulary list for second year Hebrew courses.

Unicorn Coloring Book For Kids Age 4-8! 100 completely unique unicorn coloring pages for kids ages 4-8! Unicorns are so much fun to color because they lead such interesting, magical lives! They meet princesses, dragons and mermaids. They visit castles and enchanted woodlands, fly through stars and rainbow skies and even wind up in the Land of Sweets! Share the fun and magic of unicorns with a special child! This coloring book is a great non-screen activity to stimulate a child's creativity and imagination. It makes a perfect gift! About this unicorn coloring book: - Contains 100 completely unique coloring pages. There are NO duplicate images in this book.- The pages are single-sided to prevent bleed-through, and so that pages can be removed and displayed without losing an image on the back.- We have carefully designed each page to be entertaining and suitable for children in the 4 to 8 year-old age range. We have avoided overly-intricate designs as well as overly-simplistic ones. We believe children of this age love coloring fun scenes that fire up their imaginations, not a book full of simple shapes.- The pages are a nice, large 8.5x11 size

The United States is increasingly dependent on information and information technology for both civilian and military purposes, as are many other nations. Although there is a substantial literature on the potential impact of a cyberattack on the societal infrastructure of the United States, little has been written about the use of cyberattack as an instrument of U.S. policy. Cyberattacks--actions intended to damage adversary computer systems or networks--can be used for a variety of military purposes. But they also have application to certain missions of the intelligence community, such as covert action. They may be useful for certain domestic law enforcement purposes, and some analysts believe that they might be useful for certain private sector entities who are themselves under cyberattack. This report considers all of these applications from an integrated perspective that ties together technology, policy, legal, and ethical issues. Focusing on the use of cyberattack as an instrument of U.S. national policy, Technology, Policy, Law and Ethics Regarding U.S. Acquisition and Use of Cyberattack Capabilities explores important characteristics of cyberattack. It describes the current international and domestic legal structure as it might apply to cyberattack, and considers analogies to other domains of conflict to develop relevant insights. Of special interest to the military, intelligence, law enforcement, and homeland security communities, this report is also an essential point of departure for nongovernmental researchers interested in this rarely discussed topic.

This book comprises chapters featuring a state of the art of research on digital technology in mathematics education. The chapters are extended versions of a selection of papers from the Proceedings of the 13th International Conference on Technology in Mathematics Teaching (ICTMT-13), which was held in Lyon, France, from July 3rd to 6th. ICTMT-13 gathered together over one hundred participants from twenty countries sharing research and empirical results on the topical issues of technology and its potential to improve mathematics teaching and learning. The chapters are organised into 4 themed parts, namely assessment in mathematics education and technology, which was the main focus of the conference, innovative technology and approaches to mathematics education, teacher education and professional development toward the technology use, and mathematics teaching and learning experiences with technology. In 13 chapters contained in the book, prominent mathematics educators from all over the world present the most recent theoretical and practical advances on these themes. This book is of particular interest to researchers, teachers, teacher educators and other actors interested in digital technology in mathematics education.

Winner of the Olivier Award for Best New Play 2009, *The Mountaintop* is a historical-fantastical two hander and portrays the penultimate days in the life of Martin Luther King. The night before his assassination King retires to room 306 in the now famous motel after giving an acclaimed speech to a massive church congregation. When a mysterious young maid visits him to deliver a cup of coffee, King is forced to confront his past and the future of his people. Katori Hall's award-winning play is heartbreaking, humourous and breathtakingly powerful. A lively mood and hints of surrealism and fantasy is combined with a clear-eyed view of the man behind the legend. She depicts King as a real

and at times flawed man, but nevertheless inspirational and capable of effecting momentous societal shifts. This is a story which crosses continents, colour and generations, and remains as relevant today as it was in the midst of the civil rights movement in 1968. Portraying rhetoric, hope and ideals of social change, *The Mountaintop* also explores being human in the face of inevitable death. The play is a dramatic feat of daring originality, historical narration and triumphant compassion.

The purpose of this book is to initiate a new discussion on liberty focusing on the infinite realms of space. The discussion of the nature of liberty and what it means for a human to be free has occupied the minds of thinkers since the Enlightenment. However, without exception, every one of these discussions has focused on the character of liberty on the Earth. The emergence of human space exploration programs in the last 40-50 years raise a fundamental and new question: what will be the future of liberty in space? This book takes the discussion of liberty into the extraterrestrial environment. In this book, new questions will be addressed such as: Can a person be free when the oxygen the individual breathes is the result of a manufacturing process controlled by someone else? Will the interdependence required to survive in the extremities of the extraterrestrial environment destroy individualism? What are the obligations of the individual to the extraterrestrial state? How can we talk of extraterrestrial liberty when everyone is dependent on survival systems?
