The introduction of total joint arthroplasty throughout the world has contributed manifold benefits to patients who suffer from joint diseases. Concurrently, however, there has been an increase in revision surgery. Many orthopedic surgeons agree that durability of prostheses is an eternal problem. In particular, periprosthetic osteolysis recently has been identified as one of the serious problems affecting prosthetic durability. To improve durability, osteolysis and many other problems must be investigated and solved both experimentally and clinically with respect to such aspects as prosthetic material, design, and biological and biomechanical behavior. This book comprises 37 papers that were presented by orthopedic surgeons and biomedical engineers at the 28th Annual Meeting of the Japanese Society for Replacement Arthroplasty, held in March 1998 in Kanazawa, Japan. The volume is thus a compilation of the latest knowledge about the pathogenesis and reduction of osteolysis and wear, newly developed total hip prostheses, and other current topics of total knee arthroplasty. We earnestly hope that this book will be of benefit to clinicians and researchers, and that it will contribute to the creation of more durable total joint prostheses in the future. Recoup lost time and revenue with denials management and appeals know-how. Claim denials can sink a profit margin. And given the cost of appeals, roughly \$118 per claim, not all denials can be reworked. A practice submitting 50 claims a day at an average reimbursement rate of \$200 per claim should bring in \$10,000 in daily revenue. But if 10% of those claims are denied, and the practice can only appeal one, they lose \$800 per day—upwards of \$200K annually. Your medical claims are the lifeblood of operations. Don't compromise your financial health. Learn how to preempt denials with the Denials Management & Appeals Reference Guide. This vital resource will equip you to get ahead of payers by simplifying the leading causes of denials and showing you how to address insufficient documentation, failing to establish medical necessity, coding and billing errors, coverage stipulations, and untimely filing. Rely on AAPC to walk you through the appeal process. We'll help you establish protocols to avoid an appeals backlog and teach you how to identify and prioritize denials likely to win an appeal. What's more, you'll learn when a claim can be "reopened" to fix a problem. Collect the revenue your practice deserves with effective denials and appeals solutions: Know how to analyze your denials Defeat documentation and compliance issues for successful claims success Utilize payer policy for coverage clues Lock in revenue with face-to-face reimbursement guidance Refine efforts to avoid E/M claim denials Ace ICD-10 coding for optimum reimbursement Put an end to modifier confusion Stave off denials with CCI edits advice Navigate the appeals process like a pro And much more!
