Business and management education has an important impact on business practice throughout the world. To a very large extent, possession of the MBA degree is a passport into the upper reaches of management, and CEOs of many major corporations have earned an MBA. It is a reasonable inference that the education received by these leaders and managers during their MBA experience has an important impact on the way that businesses throughout the world are led and managed and that major corporate decisions are made. The heart of the MBA education is the curriculum, and curriculum design is perhaps the most important strategic function for a business school faculty to undertake. In order to understand the many issues concerning this contemporary curriculum review, this book examines three related contextual domains. First, it details the long-term growth of business and management education. Second, it examines the major theoretical and empirical literatures on organizational evolution and decision making, paying special attention to decision making in institutions of higher education. Finally, the book describes the previous major curriculum review at Columbia Business School in the late 1950s and the subsequent changes that formed the curriculum that was changed in 1992. This book demonstrates what can be achieved by an institution that sets high standards for its business education, and assists faculty and administrators in other schools of business and management as they contemplate revision of their curricula. In addition, it provides a prime example of curriculum design effort in one of the leading institutions worldwide. Finally, it will be of interest to scholars in several different fields, notably, higher education curriculum review, organizational decision making and long-run organizational evolution.

Many corporate managers struggle to see the relevance of accounting in their everyday responsibilities. Weygandt shows them how managerial accounting information fits in the larger context of business so they are better able to understand the important concepts. The new Do It! feature reinforces the basics by providing quick-hitting examples of brief exercises. The chapters also incorporate the All About You (AAY) feature as well as the Accounting Across the Organization (AAO) boxes that highlight the impact of accounting concepts. With these features, readers will have numerous opportunities to think about
