Exam Papers - University of Auckland

Acting Kneec Chief Executive Officer Mercy Karogo. The national examinations agency has pleaded with the 1.9 million KCPE and KCSE candidates to avoid cheating in the upcoming tests. In a ...

Academic Paper from the year 2016 in the subject Sociology - Knowledge and Information, grade: 70, Moi University (Anthropology), course: Anthropology, language: English, abstract: When a person joins a social organization, it is imperative that they adapt to prosper. Change of values ordinarily occurs through compliance where one entertains and accepts the influence of comrades as they hope for favorable reactions from peers. This study was an examination of behavioral change in response to customary university values and roles) among students of Moi University main campus. The key objective was to examine factors determining behavioral change among students in Moi University. It examined the adaptive behavioral responses of students to university environmental impediments and explored strategies to encourage positive behavior development. The paper argues that students are disposed to adopt negative behavior at the University. The majority of students have inadequate fortitude and emotional intelligence to confront challenges inherent in the university environment. University rules and administration have range bound consequences on the behavior of students. The paper recommends the re-structuring of freshman orientation programs, peer mentorship, increased facilitation of student clubs and extracurricular activities, institutional recognition and awarding of outstanding students, and reconstitution of the university counseling program.

The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya, the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya.

The theme of Medinfo2007 is “Building Sustainable Health Systems”. Particular foci are health challenges for the developing and developed world, the social and political context of healthcare, safe and effective healthcare, and the difficult task of building and maintaining complex health information systems. Sustainable health information systems are those that can meet today’s needs without compromising the needs of future generations. To build a global knowledge society, there needs to be an increased cooperation between science and technology and access to high-quality knowledge and information. The papers presented are refereed and from all over the world. They reflect the breadth and depth of the field of biomedical and health informatics, covering topics such as; health information systems, knowledge and data management, education, standards, consumer health and human factors, emerging technologies, sustainability, organizational and economic issues, genomics, and image and signal processing. As this volume carries such a wide collection, it will be of great interest to anyone engaged in biomedical and health informatics research and application.

An in-depth look at the changing sociolinguistic dynamics that have influenced South African society. To date, there has been no published textbook which takes into account changing sociolinguistic dynamics that have influenced South African society. Multilingualism and Intercultural Communication breaks new ground in this arena. The scope of this book ranges from macro-sociolinguistic questions pertaining to language policies and their implementation (or non-implementation) to micro-sociolinguistic observations of actual language-use in verbal interaction, mainly in multilingual contexts of Higher Education (HE). There is a gradual move for the study of language and culture to be taught in the context of (professional) disciplines in which they would be used, for example, Journalism and African languages, Education and African languages, etc. The book caters for this growing market. Because of its multilingual nature, it caters to English and Afrikaans language speakers, as well as the Sotho and Nguni language groups _ the largest languages in South Africa [and also increasingly used in the context of South African Higher Education]. It brings together various inter-linked disciplines such as Sociolinguistics and Applied Language Studies, Media Studies and Journalism, History and Education, Social and Natural Sciences, Law, Human Language Technology, Music, Intercultural Communication and Literary Studies. The unique cross-cutting disciplinary features of the book will make it a must-have for twenty-first century South African students and scholars and those interested in applied language issues.
