Why the PSC's New Mexico Rate Case is a Disappointment

Why the PSC's New Mexico Rate Case is a Disappointment

Surviving a traumatic experience is difficult and takes time to move on from, but this book makes the argument that with proper care and understanding, survivors can grow and reshape their lives in a positive way. For the past twenty years, pioneering psychologist Stephen Joseph has worked with survivors of trauma. His studies have yielded a startling discovery: that a wide range of traumatic events—from illness, divorce, separation, assault, and bereavement to accidents, natural disasters, and terrorism—can act as catalysts for positive change. Boldly challenging the conventional wisdom about trauma and its aftermath, Joseph demonstrates that rather than ruining one's life, a traumatic event can actually improve it. Drawing on the wisdom of ancient philosophers, the insights of evolutionary biologists, and the optimism of positive psychologists, What Doesn't Kill Us reveals how all of us can navigate change and adversity- traumatic or otherwise—to find new meaning, purpose, and direction in life.

#1 New York Times bestselling author of Everything, Everything and The Sun Is Also a Star Nicola Yoon is back with her eagerly anticipated third novel. With all the heart and hope of her last two books, this is an utterly unique romance. Evie Thomas doesn't believe in love anymore. Especially after the strangest thing occurs one otherwise ordinary afternoon: She witnesses a couple kiss and is overcome with a vision of how their romance began . . . and how it will end. After all, even the greatest love stories end with a broken heart, eventually. As Evie tries to understand why this is happening, she finds herself at La Brea Dance Studio, learning to waltz, fox-trot, and tango with a boy named X. X is everything that Evie is not: adventurous, passionate, daring. His philosophy is to say yes to everything—including entering a ballroom dance competition with a girl he's only just met. Falling for X is definitely not what Evie had in mind. If her visions of heartbreak have taught her anything, it's that no one escapes love unscathed. But as she and X dance around and toward each other, Evie is forced to question all she thought she knew about life and love. In the end, is love worth the risk?

INSTANT NEW YORK TIMES BESTSELLER A Good Morning America, Esquire, and Read with Marie Claire Book Club Pick and a People Best Book of Summer Named a Most Anticipated Book of 2021 by Time, The Washington Post, Harper's Bazaar, Entertainment Weekly, Marie Claire, Bustle, BuzzFeed, Parade, Goodreads, Fortune, and BBC ??Urgent, propulsive, and sharp as a knife, The Other Black Girl is an electric debut about the tension that unfurls when two young Black women meet against the starkly white backdrop of New York City book publishing. Twenty-six-year-old editorial assistant Nella Rogers is tired of being the only Black employee at Wagner Books. Fed up with the isolation and microaggressions, she's thrilled when Harlem-born and bred Hazel starts working in the cubicle beside hers. They've only just started comparing natural hair care regimens, though, when a string of uncomfortable events elevates Hazel to Office Darling, and Nella is left in the dust. Then the notes begin to appear on Nella's desk: LEAVE WAGNER. NOW. It's hard to believe Hazel is behind these hostile messages. But as Nella starts to spiral and obsess over the sinister forces at play, she soon realizes that there's a lot more at stake than just her career. A whip-smart and dynamic thriller and sly social commentary that is perfect for anyone who has ever felt manipulated, threatened, or overlooked in the workplace, The Other Black Girl will keep you on the edge of your seat until the very last twist.

Writer/director/producer Justine Bateman examines the aggressive ways that society reacts to the aging of women's faces. "I can't think of anyone better than Justine Bateman to start the conversation about how we've devolved into a society that doesn't allow women to age. Brave, brilliant, and unflinchingly honest, Justine is that writer you trust because she goes after every subject with a warrior's focus, and throws herself to the lions while she's at it. It doesn't hurt that she's a gorgeous woman who hasn't tried to erase an ounce of history from her face. I love the way she thinks, and am amazed at the many sublayers she manages to excavate while everyone else is scratching the surface." --Mary-Louise Parker, actress, author of Dear Mr. You "These honest, no-flinch vignettes about womanhood, beauty, and meaning will make you mad, break your heart, will have you longing for a better world, have you rooting for her, yourself, for all women. And you will stand up and cheer when Bateman slides into home plate with an ending of grace and revelation. Riveting read! Profound glimpses into the soul of our society." --Deb Olin Unferth, author of Barn 8 Face: One Square Foot of Skin is a book of fictional vignettes that examines the fear and vestigial evolutionary habits that have caused women and men to cultivate the imagined reality that older women's faces are unattractive, undesirable, and something to be "fixed." Based on "older face" experiences of the author, Justine Bateman, and those of dozens of women and men she interviewed, the book presents the reader with the many root causes for society's often negative attitudes toward women's older faces. In doing so, Bateman rejects those ingrained assumptions about the necessity of fixing older women's faces, suggesting that we move on from judging a woman's worth based on the condition of her face. With impassioned prose and a laser-sharp eye, Bateman argues that a woman's confidence should grow as she ages, not be destroyed by society's misled attitude about that one square foot of skin.

"Surging sea levels are inundating the coasts." "Hurricanes and tornadoes are becoming fiercer and more frequent." "Climate change will be an economic disaster." You've heard all this presented as fact. But according to science, all of these statements are profoundly misleading. When it comes to climate change, the media, politicians, and other prominent voices have declared that "the science is settled." In reality, the long game of telephone from research to reports to the popular media is corrupted by misunderstanding and misinformation. Core questions—about the way the climate is responding to our influence, and what the impacts will be—remain largely unanswered. The climate is changing, but the why and how aren't as clear as you've probably been led to believe. Now, one of America's most distinguished scientists is clearing away the fog to explain what science really says (and doesn't say) about our changing climate. In Unsettled: What Climate Science Tells Us, What It Doesn't, and Why It Matters, Steven Koonin draws upon his decades of experience—including as a top science advisor to the Obama administration—to provide up-to-date insights and expert perspective free from political agendas. Fascinating, clear-headed, and full of surprises, this book gives readers the tools to both understand the climate issue and be savvier consumers of science media in general. Koonin takes readers behind the headlines to the more nuanced science itself, showing us where it comes from and guiding us through the implications of the evidence. He dispels popular myths and unveils little-known truths: despite a dramatic rise in greenhouse gas emissions, global temperatures actually decreased from 1940 to 1970. What's more, the models we use to predict the future aren't able to accurately describe the climate of the past, suggesting they are deeply flawed. Koonin also tackles society's response to a changing climate, using data-driven analysis to explain why many proposed "solutions" would be ineffective, and discussing how alternatives like adaptation and, if necessary, geoengineering will ensure humanity continues to prosper. Unsettled is a reality check buoyed by hope, offering the truth about climate science that you aren't getting elsewhere—what we know, what we don't, and what it all means for our future.

Top leadership researcher, consultant, and coach Susan Fowler says stop trying to motivate people! It's frustrating for everyone involved and it just doesn't work. You can't motivate people—they are already motivated but generally in superficial and short-term ways. In this book, Fowler builds upon the latest scientific research on the nature of human motivation to lay out a tested model and course of action that will help leaders guide their people toward the kind of motivation that not only increases productivity and engagement but that gives them a profound sense of purpose and fulfillment. Fowler argues that leaders still depend on traditional carrot-and-stick techniques because they haven't understood their alternatives and don't know what skills are necessary to apply the new science of motivation. Her Optimal Motivation process shows leaders how to move people away from dependence on external rewards and help them discover how their jobs can meet the deeper psychological needs—for autonomy, relatedness, and competence—that science tells us result in meaningful and sustainable motivation. Optimal Motivation has been proven in organizations all over the world—Fowler's clients include Microsoft, CVS, NASA, the Catholic Leadership Institute, H&R Block, Mattel, and dozens more. Throughout the book, she illustrates how each step of the process works using real-life examples. Susan Fowler's book is the groundbreaking answer for leaders who want to get motivation right!

Marvin Kalb, a former journalist and Harvard professor, traces how the Crimea of Catherine the Great became a global tinder box. The world was stunned when Vladimir Putin invaded and seized Crimea in March 2014. In the weeks that followed, pro-Russian rebels staged uprisings in southeastern Ukraine. The United States and its Western allies immediately imposed strict sanctions on Russia and whenever possible tried to isolate it diplomatically. This sharp deterioration in East-West relations has raised basic questions about Putin's provocative policies and the future of Russia and Ukraine. Marvin Kalb, who wrote commentaries for Edward R. Murrow before becoming CBS News' Moscow bureau chief in the late 1950's, and who also served as a translator and junior press officer at the US Embassy in Moscow, argues that, contrary to conventional wisdom, Putin did not "suddenly" decide to invade Crimea. He had been

waiting for the right moment ever since disgruntled Ukrainians rose in revolt against his pro-Russian regime in Kiev's Maidan Square. These demonstrations led Putin to conclude that Ukraine's opposition constituted an existential threat to Russia. Imperial Gamble examines how Putin reached that conclusion by taking a critical look at the recent political history of post-Soviet Russia. It also journeys deep into Russian and Ukrainian history to explain what keeps them together and yet at the same time drives them apart. Kalb believes that the post-cold war world hangs today on the resolution of the Ukraine crisis. So long as it is treated as a problem to be resolved by Russia, on the one side, and the United States and Europe, on the other, it will remain a danger zone with global consequences. The only sensible solution lies in both Russia and Ukraine recognizing that their futures are irrevocably linked by geography, power, politics, and the history that Kalb brings to life in Imperial Gamble.

Argues to redefine reading and discusses the role of technology in the new literacy, outlining steps to help teachers and parents encourage children's reading in all kinds of genres and formats including comics, magazines, technical manuals, and the Internet.

Randy Stoecker has been "practicing" forms of community-engaged scholarship, including service learning, for thirty years now, and he readily admits, "Practice does not make perfect." In his highly personal critique, *Liberating Service Learning and the Rest of Higher Education Civic Engagement*, the author worries about the contradictions, unrealized potential, and unrecognized urgency of the causes as well as the risks and rewards of this work. Here, Stoecker questions the prioritization and theoretical/philosophical underpinnings of the core concepts of service learning: 1. learning, 2. service, 3. community, and 4. change. By "liberating" service learning, he suggests reversing the prioritization of the concepts, starting with change, then community, then service, and then learning. In doing so, he clarifies the benefits and purpose of this work, arguing that it will create greater pedagogical and community impact. *Liberating Service Learning and the Rest of Higher Education Civic Engagement* challenges—and hopefully will change—our thinking about higher education community engagement.
