water moving in the form of waves. Below the surface the water moves in great currents. Ocean Waves One of the things many people love about the ocean is the waves. People love to play in the waves, surf the waves, and the sound of the waves crashing on the beach.

## Earth Science for Kids: Ocean Waves and Currents

What is the difference between Tides and Waves? • Tides are periodic rise and fall of large masses of water. They are caused by the gravitational interaction that exists between the Earth and the Moon.

• On the other hand, waves are caused by the winds blowing on the surface of the ocean or even lakes. This happens all the time. • Tides only occur in the oceans, while waves can be seen in any water body.

Ocean and Waves Energy Introduction Two types of energy can be formed in the ocean: heat from the sun known as thermal energy and from waves and tides referred to as mechanical energy. Considering that water covers about 70% of the earth ' s surface, it is an enticing thought that the world can be power-driven by only a ration of the heat trapped by the sea.
