Takes a unique approach by developing fluency in the abstract and symbolic language of algebra to ensure that readers learn, understand, and think mathematical thoughts. The goal of this book is to develop the readers' ability to read, write, think and do mathematics. The book emphasizes the appropriate and creative use of technology, but even more, the understanding of concepts and symbolism. Graphing Calculators are required. The usual topics required to prepare students for calculus are covered. However, the text is different because it identifies and emphasizes the concepts of algebra that will remain essential for students to grasp regardless of what present or future calculators can do. To this end, the symbolic language is explicitly studied because it is the way in which thoughts about algebraic processes are best expressed and remembered. Numerous

specially designed examples and problems focus on key concepts. This unique approach improves: conceptualization and understanding; the rate of current and future mathematics learning; the ability to work with problems in which genuinely algebraic concepts are essential, such as word problems and retention.

Larson's PRECALCULUS WITH LIMITS is known for delivering the same sound, consistently structured explanations and exercises of mathematical concepts as the market-leading PRECALCULUS, with a laser focus on preparing students for calculus. In LIMITS, the author includes a brief algebra review of core precalculus topics along with coverage of analytic geometry in three dimensions and an introduction to concepts covered in calculus. With the Fourth Edition, Larson continues to revolutionize the way students learn material by incorporating more real-world applications, ongoing review, and innovative technology. How Do You See It? exercises give students practice applying the concepts, and new Summarize features, and Checkpoint problems reinforce understanding of the skill sets to help students better prepare for tests. The companion website LarsonPrecalculus.com offers free access to multiple tools and resources to supplement students' learning. Stepped-out solution videos with instruction are available at CalcView.com for selected exercises throughout the text.
