The Mercedes OM906 engines of the 900 series are compact and powerful with their heavy-duty technology. These compact six-cylinder engines are very much an equal to the larger-sized engines. The fields of use for the 900 series in the off-highway sector include construction plant, crane vehicles and special-purpose machines such as piste machines.

Design. The OM656 is based on a modular design that is shared with other 4-cylinder and 6-cylinder, petrol and diesel engines. It is the replacement to the previous V6, in order to maintain the cost of production between different engines. The OM656 has dual overhead camshafts with variable valve timing, and uses AdBlue injection and exhaust gas recirculation to reduce emissions.
