procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added – On-board diagnostics and Oscilloscope diagnostics – and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel;

process. We're all doing everything we can to make things right, and I'm grateful for your patience. Thank you, Parker J. Palmer With wisdom, compassion, and gentle humor, Parker J. Palmer invites us to listen to the inner teacher and follow its leadings toward a sense of meaning and purpose. Telling stories from his own life and the lives of others who have made a difference, he shares insights gained from darkness and depression as well as fulfillment and joy, illuminating a pathway toward vocation for all who seek the true calling of their lives.

At the beginning of the Civil War, President Abraham Lincoln and his highest-ranking general, George B. McClellan, agreed that the United States must preserve the Union. Their

differing strategies for accomplishing that goal, however, created constant conflict. In *Lincoln and McClellan at War*, Chester G. Hearn explores this troubled relationship, revealing its complexity and showing clearly why the two men -- both inexperienced with war -- eventually parted ways. A staunch Democrat who never lost his acrimony toward Republicans -- including the president -- McClellan first observed Lincoln as an attorney representing the Illinois Central Railroad and immediately disliked him. This underlying bias followed thirty-five-year-old McClellan into his role as general-in-chief of the Union army. Lincoln, a man without military training, promoted McClellan on the advice of cabinet members and counted on "Little Mac" to whip the army into shape and end the war quickly.

McClellan comported himself with great confidence and won Lincoln's faith by brilliantly organizing the Army of the Potomac. Later, however, he lost Lincoln's trust by refusing to send what he called "the best army on the planet" into battle. The more frustrated Lincoln grew with McClellan's inaction, the more Lincoln studied authoritative works on military strategy and offered strategic combat advice to the general. McClellan resented the president's suggestions and habitually deflected them. Ultimately, Lincoln removed McClellan for what the president termed "the slows." According to Hearn, McClellan's intransigence stemmed largely from his reluctance to fight offensively. Thoroughly schooled in European defensive tactics, McClellan preferred that approach to fighting the war. His commander-in-

chief, on the other hand, had a preference for using offensive tactics. This compelling study of two important and diverse figures reveals how personality and politics prolonged the Civil War.

In this original and groundbreaking book, Dr Andrew Newberg and Mark Robert Waldman turn their attention to the pinnacle of the human experience: enlightenment. Through his brain-scan studies on Brazilian psychic mediums, Sufi mystics, Buddhist meditators, Franciscan nuns, Pentecostals, and participants in secular spirituality rituals, Newberg has found the specific neurological mechanisms responsible for an enlightenment experience - and how we can activate those circuits in

our own brains. In his survey of more than one thousand people who have experienced enlightenment, Newberg has also discovered that in the aftermath they have had profound, positive life changes. Enlightenment offers us the possibility to become permanently less stress-prone, to break bad habits, to improve our collaboration and creativity skills, and to lead happier, more satisfying lives. Relaying the story of his own transformational experience as well as including the stories of others who try to describe an event that is truly indescribable, Newberg brings us a new paradigm for deep and lasting change.

Global production and purchasing operations create a platform for entry into new markets. However, it takes considerable effort to plan and implement a sustainable globalization strategy; this book will help in that task. The wealth of experience and analysis featured in this book is the result of an extensive survey among leading manufacturing companies as well as countless discussions with executives who have personally wrestled with the issues of "going global." The book treats the whole range of management challenges. In breadth and depth, the insights it offers surpass what a manager or most individual companies could

the media and world governments to the concepts of saving energy, reducing pollution, protecting the environment, and developing long-term energy supply solutions. In parallel, research funding relating to alternative fuels and energy carriers is increasing on both national and international levels. Why has future energy supply become such a matter of concern? The reasons are the problems created by the world's current energy supply system which is mainly based on fossil fuels. In fact, the energy stored in hydrocarbon-based solid, liquid, and gaseous fuels was, is, and will be widely consumed for internal combustion engine-based transportation, for electricity and heat generation in residential and industrial sectors, and for the production of fertilizers in agriculture, as it is

convenient, abundant, and cheap. However, such a widespread use of fossil fuels by a constantly growing world population (from 2.3 billion in 1939 to 6.5 billion in 2006) gives rise to the two problems of oil supply and environmental degradation. The problem related to oil supply is caused by the fact that fossil fuels are not - renewable primary energy sources: This means that since the first barrel of petroleum has been pumped out from the ground, we have been exhausting a heritage given by nature.
