Non-linear derivatives are generally referred to as options. For non-linear derivatives, the delta is not constant. Rather, it keeps on changing with the change in the underlying asset. Examples include the Vanilla European option, Vanilla American option, Bermudan option, etc. Uses of Derivatives.

Derivatives are majorly used to hedge or to speculate.

Derivatives include swaps, futures contracts, and forward contracts. Options are one category of derivatives and give the holder the right, but not the obligation to buy or sell the underlying...

Derivatives vs. Options: What's the
Difference?

Platinum Futures and Options are Derivatives Contracts which give investors exposure to the international price of platinum as determined by the New York Mercantile Exchange (NYMEX) through its COMEX division, a subsidiary of the CME Group. Platinum Futures contracts give investors the right to buy or sell at a fixed price on a future date.
