popular because the gearbox was crap.

Why Is Paddle Shift Killing the Manual Transmission, and ...

Depending on the car, manual shifting can be done via the gearlever and/or racing-car style paddle shifters behind the steering wheel. No clutch is required because there's no mechanical link between gearlever or paddle shifters, which simply work as a switch to send an electronic signal to the transmission to change gears.

How and When to Change Gears with Paddle Shifters in an ...

Rather than the traditional clutch pedal and gear-shift lever on a manual transmission, drivers with an automatic transmission simply pull on the paddle itself to manually change gears. On most vehicles, the right paddle will upshift (shift to a higher gear when you're speeding up) while the paddle on the left will downshift (shift to a lower gear when you're slowing down).

What are Paddle Shifters? - Autolist

Names for specific types of semi-automatic transmissions include clutchless manual, auto-manual,, auto-clutch manual, and paddle-shift transmissions. These systems facilitate gear shifts for the driver by operating the clutch system automatically , usually by means, or under control of an actuator or servo , and sensors , while still requiring the driver to manually shift gears.
