The technology field has become a key driver of the world economy. Companies like Apple, Google, Microsoft, and Facebook are not only iconic organizations, but their founders are often legends in their own right. However, the ethnic and gender make-up of these companies are overwhelmingly reflections of their founders: white males. Anujan Simmons has worked in the technology industry for 20 years as a software developer, infrastructure architect, and software project manager. His experiences as a minority in the technology industry inspired him to describe them on his blog, Minority Tech is a curated, edited, and augmented selection of those blog entries. The titles covered include: The New Negro Problem, America and the Loss of the Black Genius, A Code of Conduct for Black Men, Why I Believe in Affirmative Action, What the world Needs from Trayvon Martin, 3 Reasons Why the Technology Industry Needs More Diversity, What Facebook Taught Me about Rape Prevention, and more.

Information technology professionals will gain invaluable information with this updated resource on how to connect concepts to key business areas. These areas include accounting, finance, marketing, management, human resources, and operations. The new edition provides concise and accessible coverage of core IT topics. Do It Yourself activities show them how to apply the information on the job. Technology professionals will then be able to discover how critical IT is to each functional area and every business.
