About Before ...

Many variations of aircraft engine starting have been used since the Wright brothers made their first powered flight in 1903.

The methods used have been designed for weight saving, simplicity of operation and reliability. Early piston engines were started by hand, with geared hand starting,

The 'Classic' 737's offered airlines many
improvements over the original versions;

Get Free Pic 737 Engine Start Procedure

increased range and capacity, better fuel economy, noise reduction from the CFM56 Turbofan engines and the problem of the engine's low ground clearance was solved by placing the engines ahead of the wing (rather than directly underneath it).
