edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Gavin de Becker's landmark book THE GIFT OF FEAR showed millions of readers how to better protect themselves from violence and unwarranted fear. Now, in FEAR LESS, de Becker answers the questions many Americans have been asking since September 11th: Can air travel be safe? What is the risk of biological or chemical attack? Can the government detect and prevent future acts? How can we best talk to our children about what has happened and what might happen? What can we do to reduce fear and worry? What specific steps can we take to reduce terrorism? What are terrorists likely to do next? Most simply, is everything going to be all right? De Becker says, "Just as your imagination has placed you in frightening situations, it is now time to place yourself in empowering situations, time to see that you have a role to play, and contrary to so many TV news stories, it isn't just victim-in-waiting." FEAR LESS offers specific recommendations that can enhance our national security and our individual safety and help put fear into perspective. Nobody in the world understands risk and safety better than Gavin de Becker. At a time of uncertainty, terrorism, and a whole new set of rules, it is hard to imagine a more important, more reassuring, and more necessary book than FEAR LESS.

Acquiring the ability to accurately shoot a pistol is no simple matter. One should not assume that the art of advanced pistol marksmanship is fully realized immediately upon reading a training manual on the fundamentals and techniques of pistol shooting; nor completely understood after having received a few hours of advice and instruction from a qualified coach or expert shooter. To become a top pistol shooter and able to produce consistently high scores, one must learn to perform all the fundamentals of shooting, acquire certain definite habits, achieve flawless coordination - and above all - have a capacity for the intense concentration essential to exercising a high degree of mental control. For this, one must train. It is difficult, if not impossible, to establish a universal system of training in pistol marksmanship which will cover all cases - one that can be adapted to each shooter's technique or special need. Training pistol shooters requires an individual approach. There is no single pattern or system for the organization of training that will entirely meet the individual requirements of all competitors, nor can one ever be expected. This is the reason knowledgeable coaches take the peculiarities of an individual - such as experience, degree of preparation and fitness, and other items - into account. They use these, and by relying on their own experience, devise a training program which allows special consideration for each shooter's capabilities. In spite of the difference in details, technique or method, there is much that is common to the training of advanced marksmen, that - in the opinion of leading coaches and shooters, applies to everyone, without exception. This manual endeavors to present, in a detailed, comprehensive manner, these universal applications. Advanced pistol marksmanship training must of necessity, avoid the involved and exceedingly complex because it is an activity whose participants form a great cross-section of our nation

Over 1000 illustrations provide the collector, dealer and museum official with the most comprehensive and representative visual reference work in print on the guns and rifles of the world. With the help of these pictures it is possible to date and place with some exactness any unfamiliar gun or rifle.

An English translation of the RARE German Luftwaffe manual using the original graphics and format. The original was dated August 1940 in Berlin, by Dr. M. Matthiesen & company. German text was translated by Bill Berg. Includes general information, disassembly, assembly, troubleshooting and more.
