Michel Foucault's *The Archaeology of Knowledge* was published in March 1969; *Discipline and Punish* in February 1975. Although only six years apart, the difference in tone is stark: the former is a methodological treatise, the latter a call to arms. What accounts for the radical shift in Foucault's approach? Foucault's time in Tunisia had been a political awakening for him, and he returned to a France much changed by the turmoil of 1968. He taught at the experimental University of Vincennes and then moved to a prestigious position at the Collège de France. He quickly became involved in activist work concerning prisons and health issues such as abortion rights, and in his seminars he built research teams to conduct collaborative work, often around issues related to his lectures and activism. *Foucault: The Birth of Power* makes use of a range of archival material, including newly available documents at the Bibliothèque nationale de France, to provide a detailed intellectual history of Foucault as writer, researcher, lecturer and activist. Through a careful reconstruction of Foucault's work and preoccupations, Elden shows that, while *Discipline and Punish* may be the major published output of this period, it rests on a much wider range of concerns and projects.

Few philosophers have had as significant an impact on contemporary thought as Michel Foucault. Rabinow has collected the best pieces from his three-volume set into a one-volume anthology.

Sunderland! Thirteen hundred years ago it was the greatest center of learning in the whole of Christendom and the very cradle of English consciousness. In the time of Lewis Carroll it was the greatest shipbuilding port in the world. To this city that gave the world the electric light bulb, the stars and stripes, the millennium, the Liberty Ships and the greatest British dragon legend came Carroll in the years preceding his most famous book, *Alice in Wonderland*, and here are buried the roots of his surreal masterpiece. Enter the famous Edwardian palace of varieties, The Sunderland Empire, for a unique experience: an entertaining and epic meditation on myth, history and storytelling and decide for yourself — does Sunderland really exist?

Michel Foucault's work is rich with implications and insights concerning spatiality, and has inspired many geographers and social scientists to develop these ideas in their own research. This book, the first to engage Foucault's geographies in detail from a wide range of perspectives, is framed around his discussions with the French geography journal *Hérodote* in the mid 1970s. The opening third of the book comprises some of Foucault's previously untranslated work on questions of space, a range of responses from French and English language commentators, and a newly translated essay by Claude Raffestin, a leading Swiss geographer. The rest of the book presents specially commissioned essays which examine the remarkable reception of Foucault's work in English and French language geography; situate Foucault's project historically; and provide a series of developments of his work in the contemporary contexts of power, biopolitics, governmentality and war. Contributors include a number of key figures in social/spatial theory such as David Harvey, Chris Philo, Sara Mills, Nigel Thrift, John Agnew, Thomas Flynn and Matthew Hannah. Written in an open and engaging tone, the contributors discuss just what they find valuable - and frustrating - about Foucault's geographies. This is a book which will both surprise and challenge.
