Solids have a definite shape and volume  
because particles in a solid vibrate about a  
fixed point Adding/taking Energy out of a  
system When you add energy to a system  
the particles begin to move faster As they  
move faster they collide and create friction  
(Heat) As they continue we get a phase  
change Six Common Phase Changes  
phase change: is the reversible physical  
change that occurs when a substance  
changes from one state of matter to  
another Six common phase changes:
