Printing, traditionally, a technique for applying under pressure a certain quantity of colouring agent onto a specified surface to form a body of text or an illustration. Certain modern processes for reproducing texts and illustrations, however, are no longer dependent on the mechanical concept of pressure or even on the material concept of colouring agent.

One of the distinguishing characteristics of this type of printing is that the dried ink impression stands up from the paper in very slight relief, perceptible by touching with the fingers or by close inspection. In all intaglio prints, except mezzotint, the design is produced from ink in lines or areas below the surface of the plate.

This is a book for low budgets and high ambition. Read it and you will learn how to put images of things onto other things. You will start by rolling up your sleeves. Your shirt will be stained anyways. At some point, you will harness the power of the sun. Go ahead, look inside. You will see that you do not need a fancy studio to print a T-shirt or a picnic blanket. There is no specialized machine required to print anything you want in any room you want. A mural, a dartboard, a deck of cards, these are all possible. In a week or a month, you will wake up to find you know words like acetate and substrate. You will be comfortable talking about ink and shopping at military supply stores. Perhaps most important of all, you will be printing images of things onto other things.

In 1979 Elizabeth Eisenstein provided the first full-scale treatment of the fifteenth-century printing revolution in the West in her monumental two-volume work, *The Printing Press as an Agent of Change*. This abridged edition, after summarising the initial changes introduced by the establishment of printing shops, goes on to discuss how printing challenged traditional institutions and affected three major cultural movements: the Renaissance, the Reformation and the rise of modern science. Also included is a later essay which aims to demonstrate that the cumulative processes created by printing are likely to persist despite the recent development of new communications technologies.

Provides an accessible guide to hand-printing fabric, and includes tips on translating design ideas into prints, the different modes of transfer, and how to use effective color combinations.

A comprehensive resource to understanding the hand-press printing of early books *Studying Early Printed Books, 1450 - 1800* offers a guide to the fascinating process of how books were printed in the first centuries of the press and shows how the mechanics of making books shapes how we read and understand them. The author offers an insightful overview of how books were made in the hand-press period and then includes an in-depth review of the specific aspects of the printing process. She addresses questions such as: How was paper made? What were different book formats? How did the press work? In addition, the text is filled with illustrative examples that demonstrate how understanding the early processes can be helpful to today's researchers. *Studying Early Printed Books* shows the connections between the material form of a book (what it looks like and how it was made), how a book conveys its meaning and how it is used by readers. The author helps readers navigate books by explaining how to tell which parts of a book are the result of early printing practices and which are a result of later changes. The text also offers guidance on: how to approach a book; how to read a catalog record; the difference between using digital facsimiles and books in-hand. This important guide: Reveals how books were made with the advent of the printing press and how they are understood today Offers information on how to use digital reproductions of early printed books as well as how to work in a rare books library Contains a useful glossary and a detailed list of recommended readings Includes a companion website for further research Written for students of book history, materiality of text and history of information, *Studying Early Printed Books* explores the many aspects of the early printing process of books and explains how their form is understood today.

When printmakers Laura Sofie Hantke and Lucas Grassmann graduated from university, they found themselves without the luxury of a professional print studio. In their search for an easy technique they could implement in their own home, they came across French artist émilie Aizier-Brouard's ingenious Kitchen Lithography, which uses aluminum foil, cola, and oil-based crayons as its main materials, and quickly became ardent fans of and experts in the process, which is eco-friendly, inexpensive, and easy to do. In this book, the first on the subject, they share what they've learned through a process of trial and error in an easy-to-follow guide on turning your kitchen into a creative studio. Hand print your own buttons, bags, pillowcases, posters, cards, T-shirts, and labels using simple household ingredients with surprising and bold results.

You don't have to be a fashion designer to create your own amazing fabrics! *Fabric Printing at Home* will show you how to create your own fabric prints using all of the traditional techniques, as well as techniques using regular everyday things you find around your kitchen! With tons of color photos, step-by-step instructions, and helpful hints, you will be crafting your very own fabric designs in no time! Learn to make print blocks, rubbing plates, stencils, fabric resists, and colorants from a wide range kitchen materials. Learn how your favorite fruits and veggies will add the perfect shapes and textures to your fabrics, or how to use recycled materials for surface design. Before you know it, you'll be crafting beautiful fabrics worthy of runways from common materials in your kitchen!
