Simple, enjoyable games build a solid foundation for successful future learning! Did You Know the Brain of an Infant... is 250% more active than that of an adult? has formed 1000 trillion connections by the end of the third year (twice as many as adults have)? produces synapses (connections) faster in the first year than at any other time of life? 125 Brain Games for Babies is a fun-filled collection of ways to develop the brain capacity of babies - the building blocks of future learning. Included are everyday opportunities to nurture brain development in the critical period from birth through 12 months. Each game has information on the latest brain research, and a discussion of how the activity promotes brain power.

Games are seen only for recreation. However, this book shows that games can be used to strengthen problem-solving skills and beyond. This book presents strategy games and discusses for each one solutions towards a winning position in the game. In most cases, these strategies are analogous to problem-solving strategies in mathematics. Readers are also exposed to a wide variety of games from several different cultures, which will broaden the perspective of the readers.

Creative Problem Solving (CPS) is a process that allows people to apply both creative and critical thinking to find solutions to everyday problems. It is a way to enhance creative behavior and also a systematic way to organize information and ideas in order to solve problems. The overall goal of CPS training is to improve creative behavior and problem-solving behavior. The skills involved are: ability to select relevant information ability to summarize information ability to analyze social situations, ability to think creatively to generate possible solutions, ability to evaluate options based on given criteria, ability to plan activities to accomplish a goal, and the ability to make inferences. Primarily Problem Solving allows you to give your younger students a head start on problem solving. This book presents creative problem solving in a step-by-step manner young children can understand and enjoy. Use the CPS process to solve the problems of the Three Little Pigs, Rapunzel, and the Frog Prince, as well as more common family problems. Each problem includes illustrated worksheets to take students through each step of the problem-solving process. Teaching notes give instructors additional ideas for using creative problem-solving techniques in the classroom. Fun problems and step-by-step guides will take students successfully from the fuzzy beginning to an effective end. The end result is confidence in being able to think through a solution, rather than just latching on to the most obvious solution. Use these exercises as a part of your thinking skills class or creativity training, as supplementary reading assignments, or as a technique to solve conflicts in the classroom.

Fascinating approach to mathematical teaching stresses use of recreational problems, puzzles, and games to teach critical thinking. Logic, number and graph theory, games of strategy, much more. Includes answers to selected problems. Free solutions manual available for download at the Dover website.
