[This book is] absolutely wonderful. It will be my new Bible... I have used it loads already in preparation for my ICT Mark assessment. Taking on the role of ICT co-ordinator can be quite a daunting task but this step by step guide, breaking things down into manageable chunks will be very supportive. I love the blogging idea - the comments made by the characters are very realistic. This is just what new co-ordinators need, I wish I'd had this when I took over co-ordination of ICT! - Christine Beedham, Primary ICT adviser, Warrington Every primary school has the daunting task of embedding ICT and e-learning into their curriculum. This practical manual is the first part of a two volume set that together makes up a detailed two year training programme for primary ICT and e-learning co-ordinators. The books combine key strategies and information with a weblog discussion from a group of 'virtual' co-ordinators who share their problems, fears and successes over the two-year programme, based on the author's wide experience of working with new co-ordinators and experienced staff on training programmes and in general support. Book 1 is designed specifically for co-ordinators new to the role who need starting points and broad support. It presents a structured training programme split over three terms, guiding co-ordinators through the key stages of developing and implementing ICT policy and practice, including: o auditing existing school systems o reviewing and revising the school policy for ICT o reviewing the ways in which ICT is used as a teaching and learning tool across the curriculum o examining methods for the management of technical support services o establishing a clear overview of standards in ICT, including a review of assessment procedures, moderating work, monitoring teaching and learning and creating E Portfolios. The books have a companion website, which will offer downloadable versions of the photocopiable sheets from the book, as well as links to other sources of help and advice.

Technology has changed the way that educators are able to present curriculum to students across grade levels and throughout the educational landscape. Advancements in technology have given special education teachers new ways to present material that meets kinesthetic, visual, and auditory learners specific needs at the same time. This project looked at how Promethean technology can be used in order to support students with moderate/severe needs. Specific interactive Promethean flipcharts were designed that correlate to four students IEP goals. In addition, an instructional manual was developed by the researcher in order to assist and encourage other special education teachers to begin developing Promethean flipcharts for their specific students. When utilized correctly Promethean technology gives educators the ability to develop and individualize digital curriculum and present it to students on a large interactive whiteboard (ActivBoard). As research has shown, the use of interactive whiteboards can drastically increase student engagement, performance, and participation.

The digital interactive projection system is a staple of nearly every music classroom in the United States. By allowing teachers to show students methods and outcomes from a computer, these systems have become a necessity for reaching students who grew up as digital natives. But, as author and distinguished music educator Catherine Dwinall demonstrates, such systems can be much more meaningful pedagogical tools than simple replacements for chalkboards. In this book, she offers practical tips, tricks, resources, and 50 activities ideal to use alongside classroom projection systems. She focuses especially on tips and activities for beginning teachers, giving them the confidence to take a step out of their comfort zone and learn new ways of engaging students with technology. More than this, she provides reference materials that will serve as a trusted reference resource for years to come.

As a professional organisation, EUROCALL has been aiming to promote innovative research, development and practice in the area of computer assisted language learning (CALL) and technology enhanced language learning (TELL) in education and training. These conference proceedings establish an overview of EUROCALL as it celebrated its 20th anniversary.

This book tackles the wider picture, addressing the social, cultural, economic, political and commercial aspects of schools and schooling in the digital age, offering to make sense of what happens, and what does not happen, when the digital and the educational come together in the guise of schools technology.

(Expressive Art (Choral)). Level 2 presents over 40 interactive formative and summative assessments with customizable rubrics. In addition to the interactive material, there are quizzes and worksheets that may be printed or sent to tablets for completion, and manipulatives that may be printed out and laminated. These assessments follow a sequential progression for teaching musical concepts - rhythm: Meter (steady beat, duple and triple meter, time signature) and Duration (quarter note and rest, and eighth notes); Pitch: Solfege (moveable do, major and minor pentatonic) and Intervals (lines/spaces, skips, steps, repeats); Expressive Elements: Dynamics (pp, mp, p, mf, f, ff, sfz, crescendo, decrescendo) and Tempo (largo, andante, moderato, allegro, presto, ritardando, accelerando, legato and staccato); Harmony (unison, melodic ostinato-tonic and dominant, rounds-rhythm and melody, descant, partner song) and Form (Elemental, Binary, Ternary, Rondo). The CD-ROM offers step-by-step interactive lessons for SmartBoard and Promethean, compatible with SmartNotebook 11 and Promethean ActivInspire 1.8.6 software. No interactive whiteboard? No problem. InterAct using the free download viewer software options. Instructions and website links enclosed. No CD-Rom drive? No problem. Interact using the optional DIGITAL DOWNLOAD CODE. Files may be directly downloaded to your computer.

Implementing and Researching Technological Innovation in Language Teaching takes a case study approach to investigate the integration of the interactive whiteboard (IWB) into the teaching of English as a Foreign Language (EFL) in French schools. The study highlights the advantages of collaborative action research for stimulating and supporting language teachers in innovative experimentation, and seeks to enhance our understanding of the challenges and opportunities inherent in this process. Utilising a framework which can inform further research into innovative practices with other interactive technologies, this book offers a research design and instruments suitable for assessing classroom adoption of the IWB. In this way, the study provides insights into general processes of technological innovation in language teaching and learning which is of relevance to further research and teacher development in today's new learning environments.

(Resource). This well-loved story is now projectable as a digital storybook via your computer's video player. Open the file, push play and watch! Audio plays while pages turn automatically. Plus! Includes optional Smart Notebook and Promethean Flipchart files with step-by-step interactive lessons from the "Beyond the Books" teacher's guide. Freddie and Eli cheer students along as digital flashcards, songs and games lead them sequentially through note name fun on Treble Clef Island! (Compatible with SmartNotebook 11 and Promethean ActivInspire 1.8.6) No interactive whiteboard or you want to use the interactive lesson files? Download the free viewer software and instruct from your computer. Instructions and website links enclosed. No CD-Rom drive? Optional DIGITAL ACCESS AVAILABLE for direct download to your computer.

Sarah Jean's Uncle Jed was the only black barber in the county. He had a kind heart and a warm smile. And he had a dream. Everyone has a favorite relative. For Sarah Jean, it was her Uncle Jed. Living in the segregated South of the 1920s, where most people were sharecroppers, Uncle Jed had to travel all over the county to cut his customers' hair. He lived for the day when he could open his very own barbershop. But it was a long time, and many setbacks-from five-year-old Sarah Jean's emergency operation to the bank failures of the Great Depression-before the joyful day when Uncle Jed opened his shiny new shop and twirled a now grown-up Sarah Jean around in the barber chair. With James E. Ransome's richly colored paintings brimming with life, this is a stirring story of dreams long deferred and finally realized.
