there is  
evidence of  
uncertainty,  
particularly  
amongst many  
scientists and  
decision-makers,  
as to the  
nature, scope  
and objectives

Secondly, there is much confusion over the objectives and utility of certain EIA methods. Third, there appears to be a gulf developing between decision-makers and what they require

the ability of  
the scientist to

Finally, there  
appears to be  
little concern  
as to the  
relationship  
between "impact

the actual  
consequences of a  
development

suggesting that
