For much of its early history the U.S. Army Corps of Engineers was heavily involved in the design and construction of new facilities, but now the mission of the Corps is shifting from construction to the maintenance of existing facilities.

# Where To Download

The Corps has addressed its changing role by instituting a Repair, Evaluation, Maintenance, and Rehabilitation (REMR) program. As a part of this program, a project team at Iowa State University has undertaken a research effort that

Henry Ford's Model  
T forever changed  
the world. The car  
made "for the great  
multitude" (as Ford  
put it) first debuted  
in 1908 and proved

so affordable and so popular that fifteen million were sold through 1927. The "Tin Lizzie" was the first automobile to be mass-produced on moving assembly lines, and built using interchangeable parts. It proved tough and reliable in everyday use, and

revolution: the car  
cost \$850 in 1909  
but amazingly by  
the 1920s, the price  
had dropped to a  
mere \$260 due to  
the perfection of  
production  
techniques and  
economy of scale.

Designed by a team
