East Africa is home to a remarkable assemblage of reptiles, from crocodiles and chameleons to turtles and tortoises, lizards, worm-lizards, and a stunning array of snakes. The region is a true herpetological hot-spot. This fully revised edition of the classic field guide to the region's reptiles explores the full diversity of these animals. With updated text, detailed maps and more than 600 new photographs, this book includes every one of the 500 or so species in the region. All are described and mapped, with virtually every species accompanied by at least one colour photograph. Comprehensive and definitive, Field Guide to East African Reptiles is an essential tool for all naturalists, conservationists, educators, field workers, medical personnel and students in the region.

Download Ebook Rock Identification Activity Guides Dichotomous Keys

This core text for the K-8 methods course in science is a practical guide to teaching science in inquiry-centered and standards-based classrooms. Its inclusive coverage of the major domains of science includes examples from the studies of life, physics, earth, space, and environment. This edition integrates technology thoroughly with science content, instructional methods, and cues to monitoring student development. Marginal icons focus on implementing standards in lessons, highlighting the National Science Education Standards, the Benchmarks for Science Literacy, the National Educational Technology Standards, and the Standards for Technological Literacy. Practical classroom-tested suggestions are provided to help teach students with special needs, differing abilities, and diverging learning styles.

Small enough to carry in a backpack, this comprehensive guide explores the many diverse natural communities of Michigan, providing detailed descriptions, distribution maps, photographs, lists of characteristic plants, suggested sites to visit, and a dichotomous key for aiding field identification. This is a key tool for those seeking to understand, describe, document, conserve, and restore the diversity of natural communities native to Michigan.
