2) Remove the magazine from the pistol and release the bolt by pulling it back and releasing it (using the bolt stop to release it may eventually wear it to the point of it not locking the bolt back). Now point the pistol in a safe direction and pull the trigger (dry fire is ok with this pistol, even without a snap cap, according to Ruger).

The Ruger Standard, the main difference between the Standard and Mark II is that with the Mark II the Slide locks back once the magazine is empty. At the end of a magazine, the slide of the MK II locks back so you know you're empty, though felt recoil is so little that sometimes you pull the trigger once or twice on empty when firing rapidly.
