The past comes back to haunt black ops specialist Sean Dillon and his colleagues in this New York Times bestselling novel of terrorism, revenge, and a very old nemesis... On a dark summer night, two Chechen mercenaries emerge from the waters off Nantucket to kill a high-value target, the former President of the United States. Unfortunately for them, the president has guests that night, including Sean Dillon and his colleague, Afghan war hero Captain Sara Gideon. The Chechens do not survive the night, but Dillon is curious about how they even got on the island. What he discovers sends a chill through his bones—a name from Dillon’s distant past. If this man is working with the terrorists now, the assassination attempt is only the beginning—and next time, the results may be much, much different.

This book provides a detailed and up-to-date overview on classification and data mining methods. The first part is focused on supervised classification algorithms and their applications, including recent research on the combination of classifiers. The second part deals with unsupervised data mining and knowledge discovery, with special attention to text mining. Discovering the underlying structure on a data set has been a key research topic associated to unsupervised techniques with multiple applications and challenges. From web-content mining to the inference of cancer subtypes in genomic microarray data. Among those, the book focuses on a new application for dialog systems which can be thereby made adaptable and portable to different domains. Clustering evaluation metrics and new approaches, such as the ensembles of clustering algorithms, are also described.

The thrilling final installment in Tanya Huff's military sci-fi adventure Confederation series Gunner Sergeant Torin Kerr was the very model of a Confederation Marine. She'd survived more deadly encounters than anyone in the Corps. No one who'd ever served with her could imagine her walking away from the Corps. But that was before Torin had learned the truth about the war the Confederation was fighting--before she'd been declared dead and had spent time in a prison that shouldn't exist... It was Salvage Operator Craig Ryder who had refused to believe Torin was dead. Craig who found and rescued Torin. And so, when her mission was complete, Torin resigned from the Marines to start a new life with Craig aboard his tiny salvage ship, the Promise. But civilian life was a lot rougher than Torin had imagined. The salvage operators were losing cargo and lives to pirates. Because salvagers were an independent lot unwilling to turn to the OutSector Wardens for help, no one in authority seemed to take their ever-increasing threat seriously. Then, on their first real run together, pirates attacked the Promise, kidnapping Craig and leaving Torin to die. But leaving Torin behind to die was never a good strategy. Against all odds, she survived, and certain--despite no evidence to prove her correct--that Craig was still alive, she decided to mount a rescue mission. When Craig's salvager friends refused to join her, Torin had no choice but to call in the Marines--some very special Marines. Then she discovered why the pirates had been trying to kidnap salvagers. And suddenly Torin's mission expanded from saving Craig to stopping the pirates from changing the balance of power in known space....

An Outrageous Proposal When Georgia Page accepts Sean Connolly's proposal, she knows it's crazy. Discover 69 wilderness areas--including seven new ones--showcasing everything from mountains to canyons, rushing rivers to desert landscapesA comprehensive guide to Colorado's wild areas Totally updated and revised Includes 74 maps and 90 photosMuch has changed in the landscape of Colorado's wilderness designations since the first edition of this book appeared in 1992. At the newly designated Black Canyon of the Gunnison National Park, visitors peer into the depths of this narrow canyon that drops 2,000 feet to the Gunnison River below--and some choose to follow rugged backcountry routes down to the inner canyon. A trail in Spanish Peaks Wilderness, established in 2000, leads up one of these twin sentinels that rise above the edge of the high plains. Nestled at the base of the Sangre de Cristo Mountains and standing up to 750 feet high, the dunes of the newly enlarged Great Sand Dunes National Monument and Preserve are the tallest in the Western Hemisphere. Other recent additions to Colorado's protected lands include the Castle Peak Wilderness Study Area, Bull Gulch Wilderness Study Area, San Luis Hills Wilderness Study Area, and Demaree Canyon Wilderness Area. Colorado is one of the nation's primary adventure-travel destinations, and both visitors and locals will find this book the most all-inclusive reference available to the state's wildness areas. From the state's high peaks to its spectacular canyons and deserts, Exploring Colorado's Wild Areas provides detailed information on seasons, flora and fauna, geology, history and activities.
