of study: -structure of life -classification of living organisms -ecological communities This personalized resource helps students review and study for tests. Mark Twain Media Publishing Company specializes in providing engaging supplemental books and decorative resources to complement middle- and upper-grade classrooms. Designed by leading educators, this product line covers a range of subjects including mathematics, sciences, language arts, social studies, history, government, fine arts, and character.

It's the revolutionary science study guide just for middle school students from the brains behind Brain Quest. Everything You Need to Ace Science . . . takes readers from scientific investigation and the engineering design process to the Periodic Table; forces and motion; forms of energy; outer space and the solar system; to earth sciences, biology, body systems, ecology, and more. The BIG FAT NOTEBOOK™ series is built on a simple and irresistible conceit—borrowing the notes from the smartest kid in class. There are five books in all, and each is the only book you need for each main subject taught in middle school: Math, Science, American History, English Language Arts, and World History. Inside the reader will find every subject's key concepts, easily digested and summarized: Critical ideas highlighted in neon colors. Definitions explained. Doodles that illuminate tricky concepts in marker. Mnemonics for memorable shortcuts. And quizzes to recap it all. The BIG FAT NOTEBOOKS meet Common Core State Standards, Next Generation Science Standards, and state history standards, and are vetted by National and State Teacher of the Year Award-winning teachers. They make learning fun, and are the perfect next step for every kid who grew up on Brain Quest.

From Galileo to scientists working on cloning, notebooks have been used to document scientific discovery. Science notebooks are also effective tools in the classroom. They make science experiences more meaningful and authentic for students as they observe, record, and reflect on what they've learned. For time-strapped teachers, notebooks offer a natural way to integrate science and language arts. Brian Campbell and Lori Fulton spent four years investigating the use of science notebooks by students, teachers, and practicing scientists. This book not only details what they learned, it serves as a ready resource of strategies and methods for teachers to incorporate science notebooks into their school day. Along the way, the book intersperses additional help: Classroom vignettes demonstrate how science notebooks actually function in class. Student samples allow readers to see student entries at a variety of levels. Thinking points throughout link ideas presented in the book to practice and philosophical beliefs. Connections to standards--both the National Science Education Standards and the Standards for the English Language Arts - reinforce the rationale for using science notebooks to develop scientific concepts AND literacy. Use science notebooks and watch as your students write as scientists do, share their thinking, support their ideas with evidence, and improve their literacy through reading, writing, and speaking.

Interactive Notebooks: Science for grade 1 is a fun way to teach and reinforce effective note taking for students. Students become a part of the learning process with activities about living and nonliving things, habitats, states of matter, light, soil, weather, and more! --This book is an essential resource that will guide you through setting up, creating, and maintaining interactive notebooks for skill retention in the classroom. High-interest and hands-on, interactive notebooks effectively engage students in learning new concepts. Students are encouraged to personalize interactive notebooks to fit their specific learning needs by creating fun, colorful pages for each topic.
