Snowboard Flex Guide - download.truyenyy.com  
Unfortunately, there is no standardized flex rating system for snowboards. The majority of snowboard manufacturers use a 1-10 flex rating system (1=super soft, 10=very stiff) while others will use a proprietary system to convey the same message. We think it's most helpful to break flex down into three classes: soft, medium, and stiff.

Snowboard Size Chart & Buying Guide | Tactics  
Snowboard Flex & Riding Style. Soft Flex - Freestyle. Soft boards are easy to turn at low speed and don't overreact to your movement, forgiving mistakes you might make on rails and kickers. Their response at low speed makes them perfect for jibbing and indoor riding, but they can feel unstable at high speeds.

Snowboard Buying Guide - The Snowboard Asylum  
A twin tip snowboard has a perfectly symmetrical shape. The nose and tail have the same dimensions and the board rides the same both forward and backwards. This applies to the sidecut and flex, too. You find this shape in freestyle and jib boards as they are best suited for park, kickers and rails.

How To Buy A Snowboard | Buyer's Guide | Blue Tomato  
The flex of a freeride snowboard is usually stiffer than that of a freestyle board. Shop Freeride Snowboards . Powder. Best for deep powder snow. Everything about a powder snowboard is designed with deep snow in mind, from the shape of the nose and tail to the flex of the board and the location of the binding inserts. Many powder boards feature ...

How to Choose a Snowboard | REI Co-op  
Flex, in the world of snow sports, refers to how rigid your boots are. While ski boots are rated with numbers generally from 70-130, snowboard boots are a more standard "1-10" system. A rating of 1 would mean something about as stiff as a worn in leather boot. A rating of 10 would be the equivalent of a concrete shoe.
