Social behavior: Its elementary forms, Revised ed

Using concepts borrowed from animal behavior studies, the author forms 4 perceptions concerned with stimuli, reward, and value. These are applied to several areas of "human exchange" such as influence, conformity, competition, esteem, and interactions. They are discussed in terms of satisfaction, authority, equality, status, justice, conformity, and innovation.

George C. Homans, *Elementary Forms of Social Behavior*, (2nd Ed.), New York: Harcourt Brace Jovanovich, 1974. Our first proposition relates a man's (or woman's) action to its success in getting a favorable result. In classical psychology it is called "the law of effect." Because we believe another name will make its meaning more obvious, we shall call it the success proposition.
