Answers
in Design Science,
this book proposes a
new research method
to aid the exploration
of design and
problem solving
within business,
science and
technology. It seeks
to overcome a

Read Online Software

dichotomy that exists in the field between theory and practice to enable researches to find solutions to problems, rather than focusing on the explanation and exploration of the problems themselves.

Currently, researches concentrate on to describing, exploring,

Read Online Software

Explaining and predicting phenomena, and little attention is devoted to prescribing solutions. Herbert Simon proposes the need to develop a Science of the Artificial (Design Science), arguing that our reality is much more artificial than natural. However, the

Read Online Software

research conducted on the Design Science premises has so far been scattered and erratic in different fields of research, such as management, systems information and engineering. This book aims to address this issue by bringing these fields together and emphasising the

Read Online Software

need for solutions.

This book provides a valuable resource to students and researchers of research methods, information systems, management and management science, and production and operations management.

Read Online Software

This book contains a selection of articles from The 2014 World Conference on Information Systems and Technologies (WorldCIST'14), held between the 15th and 18th of April in Funchal, Madeira, Portugal, a global forum for researchers and practitioners to present and discuss
