is to emphasize the relationship between structure and reactivity. To accomplish this, the content is organized in a way that combines the most useful features of a functional group approach with one largely based on reaction mechanisms. The authors' philosophy is to emphasize mechanisms and their common aspects as often as possible, and at the same time, use the unifying features of functional groups as the basis for most chapters. The structural aspects of the authors' approach show students what organic chemistry is. Mechanistic aspects of their approach show students how it works. And wherever an opportunity arises, the authors' show students what it does in living systems and the physical world around us.

Maestro Series. The book is aimed at three problem areas of Organic Chemistry - problem-solving, visualization of structures and understanding of mechanisms. The well illustrated reactions with elaborate and stepwise explanation of their mechanisms combined with a concise and easy-to-understand text help students master the basic concepts of the subject. The author is a master teacher of Organic Chemistry who understands the challenges faced by the students preparing for IIT-JEE in terms of practice problems and clarity of concepts. In view of these problems, the author has customized the book to meet their requirements. Various solved and unsolved problems have been specially chosen for IIT-aspirants to combat the ever-changing pattern of IIT-JEE. The concepts are explained in the most lucid manner and the relevance to IIT-JEE is enhanced by elaborating concepts related to the syllabus.
