Story mapping is a method for arranging user stories to create a more holistic view of how they fit into the overall user experience.

Story Mapping | Definition and Overview of Story Mapping ...

A story map is a strategy that uses a graphic organizer to help students learn the elements of a book or story. By identifying story characters, plot, setting, problem and solution, students read carefully to learn the details. There are many different types of story map graphic organizers.

Story Maps | Classroom Strategies | Reading Rockets

User story mapping is a collaborative exercise that helps align cross-functional teams around building a product that will be better tomorrow than it is today. For this reason, any team whose work will contribute to the successful delivery of customer value should be represented.

A guide to user story mapping (with examples) | Aha!

Using a story map template helps you keep track of the most important parts of the plot of a story including the main characters, the setting, the key events, the conflict, and the resolution. Students typically use story map worksheet to visually organize the elements of fiction writing. With it, they can follow a plot's linear progression.

41 Free & Printable Story Map Templates [PDF / Word] ? ...

Story mapping is a technique championed by Jeff Patton. It provides us with a way to envisage the entire product or service as a series of tasks which the user completes. In purely practical terms, it involves building a grid of user stories which are laid out under headings that represent the user's experience moving through your product.

An introduction to user story mapping - Manifesto

Story Mapping is a better way to work with Agile User Stories. User Story Mapping is a dead simple idea. Talk about the user's journey through your product by building a simple model that tells your user's story as you do. It turns out this simple idea makes working with user stories in agile development a lot easier.

User Story Mapping - Jeff Patton & Associates

Story mapping is an effective inception tool to create a product backlog in a visually structured way. It helps in building a shared understanding, identify gaps in the backlog, see interdependencies, perform better relative sizing. Further, it can also help in slicing and release planning activities.
