Written by research experts, this volume of Progress in Molecular Biology and Translational Science focuses on current science surrounding the mechanisms of DNA repair. Contributions from leading authorities Informs and updates on all the latest developments in the field

This book constitutes the proceedings of the 7th Joint International Conference on Service-Oriented Computing, ICSOC-ServiceWave 2009, held in Stockholm, Sweden, in November 2009. The 54 contributions to this volume, consisting of 37 full papers, 8 short papers and 9 demonstration papers, were carefully reviewed and selected from 228 submissions. The papers are arranged in topical sections on composition, discovery, design principles, customization and adaptation, negotiation, agreements and compliance, selection, platforms and infrastructures, security, modeling and design, validation and verification, reputation and ranking, and service management. This volume launches the new subline of Lecture Notes in Computer Science, entitled LNCS Services Science.

This book constitutes the proceedings of the 13th International Conference on Cloud Computing, CLOUD 2020, held as part of SCF 2020, during September 18-20, 2020. The conference was planned to take place in Honolulu, HI, USA and was changed to a virtual format due to the COVID-19 pandemic. The 16 full and 6 short papers presented were carefully reviewed and selected from 49 submissions. They deal with the latest fundamental advances in the state of the art and practice of cloud computing, identify emerging research topics, and define the future of cloud computing.

"There is no doubt that the Eisenhower administration accomplished one of its paramount Cold War strategic objectives: to rebuild Japan's economy and reinstate the nation as a stabilizing, pro-capitalist member in the new world order that had come out of the morass of the Great Depression and the rubble of World War II."--from the Introduction This innovative study investigates how Japan grew from an economically limited country to the threshold of industrial power. The author describes Japanese economic development in the 1950s as one of

the major achievements of the Eisenhower administration. In her admirably-clear account of this chapter in U.S.-Japanese relations, Sayuri Shimizu incorporates Japanese as well as American sources. In the process she explains how and why the United States became so intractably involved in Southeast Asia. Not least, she tells an ironic and instructive story of how the United States helped build an economy that later it so bitterly resented.

How does the way in which we heat, cool, insulate, furnish, and ventilate our buildings affect our health? What is the association between physical and chemical conditions of indoor air and human health? This new book presents the latest breakthroughs in applied research in the areas of chemical sensitivity, allergies, bioaerosols, neurotoxicity, and carcinogenic effects of radon and tobacco smoke. Anyone involved in public health, including epidemiologists, health regulators, public health scientists, microbiologists, radiologists, organic chemists, environmental scientists, neurotoxicologists, and industrial hygienists, will find the information in *Indoor Air and Human Health* both practical and interesting.

Volume 2 of the *Textbook of Neural Repair and Rehabilitation* stands alone as a clinical handbook for neurorehabilitation.
