Prepared under the auspices of the International Council of Nurses (ICN), this first volume provides a comprehensive overview of the rapidly emerging field of advanced nursing practice. It addresses central issues in the role and practice development that are fundamental to defining and differentiating the nature of this field. Topics include defining the role, role characteristics, scope of practice, education, regulation and research. Obstacles to and facilitators of that role are addressed and include ethical questions arising in the context of practice development. With an international focus, this volume examines international developments in the field, as reflected in country-specific case studies and examples. It offers a valuable resource for advanced practice nurses, educators and administrators at healthcare institutions.

It is vital for organisations to use company analysis to gain understanding of their limiting and enabling factors and strategic capabilities. Profits can then be maximised by selecting the most effective strategies, and through successful implementation of mergers, acquisitions and divestment opportunities. In this book Jenster and Hussey move away from the opinion based SWOT analysis commonly used, to provide a more objective step-by-step approach to objectively analysing an organisation. This important task is clearly explained, with information helpfully displayed in diagrams, and checklists of critical questions provided. In addition to the key, functional areas of management, corporate-wide approaches such as core

competencies, critical success factors, industry analysis and the value chain are also examined. The book is illuminated with examples from the authors' own experiences, resulting in a practical and effective approach which will provide a foundation for corporate strategy and add a strategic dimension to a due diligence study - and so prove invaluable to MBA students and lecturers in strategic management. Every manager will be asked to participate in assessing strengths and weaknesses at some time in their career, and this book enables a considerable improvement to be made to many commonly used methods - and for those responsible for the development of strategies, it offers even more.

discussion Covers NP practice financial management Comprehensive instructor's manual available including presentation slides, chapter guides, and grading rubrics This textbook is designed for students preparing as advanced practice clinicians, including APRNs, DNPs, DPTs, DOTs, and physician assistants. The book covers both health policy issues and practice financial management issues. It is organized into seven sections in two parts. The first part is focused on macro issues in healthcare finance, and the second part is focused on healthcare financing management in professional practice. This approach provides the context necessary for the clinician to understand how to manage reimbursement requirements and preferred provider contracting as health care financial policy drives these
