Prepared under the auspices of the International Council of Nurses (ICN), this first volume provides a comprehensive overview of the rapidly emerging field of advanced nursing practice. It addresses central issues in the role and practice development that are fundamental to defining and differentiating the nature of this field. Topics include defining the role, role characteristics, scope of practice, education, regulation and research. Obstacles to and facilitators of that role are addressed and include ethical questions arising in the context of practice development. With an international focus, this volume examines international developments in the field, as reflected in country-specific case studies and examples. It offers a valuable resource for advanced practice nurses, educators and administrators at healthcare institutions.

The "Greatest Business Book of All Time" (Bloomsbury UK), In Search of Excellence has long been a must-have for the boardroom, business school, and bedside table. Based on a study of forty-three of America's best-run companies from a diverse array of business sectors, In Search of Excellence describes eight basic principles of management -- action-stimulating, people-oriented, profit-maximizing practices -- that made these organizations successful. Joining the HarperBusiness Essentials series, this phenomenal bestseller features a new

Authors' Note, and reintroduces these vital principles in an accessible and practical way for today's management reader.

Making informed decisions is the essential beginning to any successful development project. Before the project even begins, you can use needs assessment approaches to guide your decisions. This book is filled with practical strategies that can help you define the desired results and select the most appropriate activities for achieving them.

A multidisciplinary consideration of how effective environmental citizenship can be in achieving sustainability, with theoretical, practical, and ethnographic perspectives.

Seminar paper from the year 2019 in the subject Business economics - Investment and Finance, grade: 1,0, Leipzig Graduate School of Management, language: English, abstract: In this paper the company E\*TRADE Financial Corporation ('E-Trade') is analyzed from a strategic point of view. The objective of this paper is to derive a recommendation for the strategic positioning and evaluate if it would be a clever investment at the moment. In order to reach the objective, this paper follows a comprehensive structure: First, an overview of E-Trade and its industry is given. Second, E-Trade will be analyzed from an external perspective. This includes a macro, industry, and competitor analysis. Third, an internal analysis is conducted which is done by breaking down E-Trade's value chain and benchmarking internal KPI against the main competitors. Fourth, the findings of the individual analyses are integrated in order to derive strategic recommendations for action. Lastly, the results of the paper are concluded and a final investment recommendation is provided.

This open access book focuses on both the theory and practice associated with the tools and approaches for decisionmaking in the face of deep uncertainty. It explores approaches and tools supporting the design of strategic plans under deep uncertainty, and their testing in the real world, including barriers and enablers for their use in practice. The book broadens traditional approaches and tools to include the analysis of actors and networks related to the problem at hand. It also shows how lessons learned in the application process can be used to improve the approaches and tools used in the design process. The book offers guidance in identifying and applying appropriate approaches and tools to design plans, as well as advice on implementing these plans in the real world. For decisionmakers and practitioners, the book includes realistic examples and practical guidelines that should help them understand what decisionmaking under deep uncertainty is and how it may be of assistance to them. *Decision Making under Deep Uncertainty: From Theory to Practice* is divided into four parts. Part I presents five approaches for designing strategic plans under deep uncertainty: Robust Decision Making, Dynamic Adaptive Planning, Dynamic Adaptive Policy Pathways, Info-Gap Decision Theory, and Engineering Options Analysis. Each approach is worked out in terms of its theoretical foundations, methodological steps to follow when using the approach, latest methodological insights, and challenges for improvement. In Part II, applications of each of these approaches are presented. Based on recent case studies, the practical implications of applying each approach are discussed in depth. Part III focuses on using the approaches and tools in real-world contexts, based on insights from real-world cases. Part IV contains conclusions and a synthesis of the lessons that can be drawn for designing, applying, and implementing strategic plans under deep uncertainty, as well as recommendations for future work. The publication of this book has been funded by the Radboud University, the RAND Corporation, Delft University of Technology, and Deltares.

This book introduces and explains how to conduct a Social Return on Investment (SROI)

analysis. It discusses the various advantages and disadvantages of different research strategies and designs, and explores the different ways in which SROI analysis results can be used for communication, outreach, and strategic decision-making. It provides insights into how and to what extent SROI analyses can help to meet different expectations, and presents different social impact research designs and methods. It presents an analytical framework for the identification of a proper SROI analysis, and shows readers how to establish an impact model, introducing a stakeholder-based approach.

Confronting Climate Uncertainty in Water Resources Planning and Project Design describes an approach to facing two fundamental and unavoidable issues brought about by climate change uncertainty in water resources planning and project design. The first is a risk assessment problem. The second relates to risk management. This book provides background on the risks relevant in water systems planning, the different approaches to scenario definition in water system planning, and an introduction to the decision-scaling methodology upon which the decision tree is based. The decision tree is described as a scientifically defensible, repeatable, direct and clear method for demonstrating the robustness of a project to climate change. While applicable to all water resources projects, it allocates effort to projects in a way that is consistent with their potential sensitivity to climate risk. The process was designed to be hierarchical, with different stages or phases of analysis triggered based on the findings of the previous phase. An application example is provided followed by a descriptions of some of the tools available for decision making under uncertainty and methods available for climate risk management. The tool was designed for the World Bank but can be applicable in other scenarios where similar challenges arise.

This third edition of Jo Bryson's highly regarded *Managing Information Services* has been thoroughly revised with an emphasis on managing for a sustainable future. Libraries and information services face uncertain times and this new edition tackles the challenges of planning and managing change, future-proofing for tomorrow, and leading the transformation to a sustainable future. The text also addresses the integration of information services including librarianship, records management and ICT. Essential reading for information students, this text also serves as a comprehensive and detailed reference on the key management topics for information service managers.

Having read this book: You will have a basic understanding of strategy and the process of strategic management. You will know the most important strategy tools (incl. the respective original literature) and how they interact. You will be aware of the focal areas and considerations of strategy in practice. You will be able to analyze and interpret business information with regard to the underlying strategic notions.
